“Neptune”

WATER PUMP for FORDS

Simplest in Construction—Easiest to Install—Most
Efficient in Operation—and Remarkably
Low in Price

Think of it! Only \$5.75 for a “pump” that makes
the water pump” through your Ford engine and
radiator. Driven by your regular fan belt, the
“Neptune” forces water faster, cools the engine
better, runs more quietly. Designed especially
for the Ford motor and renders the same depend-
able service.

It attaches quickly and easily by simply remov-
ing the two studs which hold the water connection
in the side of the motor and loosening the hose clip
at the end of the pipe near the radiator. A screw
driver and wrench are the only tools needed. No
bracing—no adjustments to make. It sets ex-
tremely low on motor block—out of the way, and
there to stay.

With a Neptune Water Pump on your Ford Car
or Truck, you will have

- positive and perfect water circulation. No boiling, steam-
ing radiator.
- No overheated motor with resulting pre-ignition, sluggish
power, pitted valves, burned bearings, scored cylinders,
heavy carbon deposits, and waste of lubricating oil.
- No frozen radiator while car is running on cold days.
- No cracked cylinders, bursted radiators, and excessive use
of water and alcohol.
- No discomfort from heat coming through floor boards.

Only **\$5.75 Complete**

Non-Freezing Peerless Radiators for Fords—
regular price \$25.—Special Price this month \$15.00

Phone 60 E. FARMER

NOTICE!

We still have four Grand River Ave., unre-
stricted business lots in Brookdale Subdivision
that can be bought for \$20 per foot with 10 per cent
down, and three Grand River Ave. business lots
in the Pickett Subdivision that can be bought for
\$25 per foot with 10 per cent down.

These are the original Subdivision prices and
terms and we believe their value will treble within
three years. Already Frontage up-town and at
the Junction is held at prices ranging from 10 to
20 times as much.
