THE BEST IS NOT TOO GOOD

Sometimes a storekeeper believes that because his stock is not the largest—his fixtures not the newest—his store not in the best location—his building not imposing—he doesn't need the most improved lighting.

Experience proves the contrary. More than other storekeepers who are better circumstanced, he needs the best lighting to offset disadvantages that he cannot easily control.

No other improvement that he can think of has such power to increase trade as this single item of lighting. Lighting attracts. Lighting makes sales. Lighting pays profits.

We will inspect your lighting equipment and suggest improvements, without charge.
