My Goodness What a Big Change in This Old Home!

When the owner decided to build a sleeping porch and a spacious sun parlor, he had no idea how much beauty, comfort, convenience and value he would add to this old home. To his amazement he had changed the plain, old fashioned home into an up-to-date, beautiful village home.

Cut out, in outline, the picture below which shows the part that was added in remodeling; lay it on the large picture in the correct position and see the difference.

Come in and look over our book "Old Homes Made New." It will suggest changes and improvements that you can economically make to your home; or if you prefer we'll bring the book over to your house any time.

Another Prospect Avenue Home Under Construction

Have you heard who is subdividing the Eiy farm and how it is planned to make this a super subdivision? More positive proof that those now building homes on Valley View or Prospect Avenues will also have a very good investment!

I have plans for a splendid brick veneer home, with garage that I will build for \$9,500, on easy terms.
