

Make up your mind, add surprise

WHAT'S HOT in beauty? Makeup that is appealing. Hair that is less structured, but frequently styled with a surprise element.

WHAT'S HOT in makeup? Color!!! Fresh, sheer color that creates a variety of looks. Just a touch of color highlights one's natural coloring for an appealing work-style look. Layers of

pulsating color accent a single focal point, the eyes or the lips, while the rest of the face is played down for an alluring look.

Eye color is always soft around the edges. There is no harsh contrast between the eyelashes and eyelids. That's why mascara is making news, in softer colors as in greys and browns, or in brilliant colors such as blues, greens

and violets.

And watch for sheer nail color that has just a hint of opalescence.

WHAT'S HOT in hair? Styles that are less structured and more feminine, the overall shape of the hair is smooth, but look for one piece or section of hair that moves off in another direction to create a sense of surprise.

And speaking of hair, look for the re-

turn of the "snood." Thousands of women, who tucked their long hair inside these crocheted hairnets while playing Rosie the Riveter on the assembly line, turned the "snood" into a genuine World War II fashion item. The most famous pinup of them all, Betty Grable, wore a "snood" when her photograph winked provocatively at millions of wartime GIs.

Lois Pershin of Oak Park loves the feeling of freedom that lighter spring clothing gives. Her Tally of New York sleeveless, extended European shoulder, hip wrap, polka dot dress, \$350, demonstrates the confident, at ease looks that are the trademark of the season ahead. Chudik's, Birmingham.

HURRY SPRING

Pant-her does the new soft look for spring
