

How Raiders Kept Pressure On Falcons

Farmington's Tom Massey drops back in his end zone to punt. The center is low and he looks for the ball... and finally picks it up... and starts to run but North Farmington tacklers smother him in the end zone for a safety and two points. (Photos by Warren G. Bopp)

U-M Has Top Temperance File

ANN ARBOR Historical Collections over the past two years, says Robert Warner, director. "Today our manuscript groups has been built up by the University of Michigan

temperance movement, culminating in prohibition, are among the best in the country," Warner notes. Michigan has always played a prominent role in temperance reform.

"Two years ago the Prohibition Party National Committee, which is headquartered in Kalamazoo, began depositing its historical records with us," says Warner. "Significant items included early minute books and printed materials. During the past academic year, the party continued to add to its collection. New materials included rare books and a letter of John Russell, founder of the party and a Michigan Methodist minister."

"The U-M collection also includes papers of Earl F. Dodge, executive secretary of the Prohibition Party. His papers cover the period 2948 to 1969, and contain correspondence and information on the national organization. There are also items that shed light on Dodge's religious and civic interests," Warner notes.

Last year the University received from the American Council on Alcohol Problems, successor to the Anti-Saloon League of America, correspondence, photographs and pamphlets covering the period 1919 through 1950. Important ingredients of the collection include letters of Howard Hyde Russell, founder of the Anti-Saloon League, and Wayne B. Wheeler, considered by many to be the chief architect of prohibition.

"Closely allied with the American Council on Alcohol Problems is the Ohio Council on Alcohol Problems, the legal descendant of the Anti-Saloon League of Ohio," says Warner.

"The Ohio League was considered the model for effective action on the state level," he says. "It has given us a valuable collection covering the years from 1902 to 1957. The collection includes correspondence, minutes, newspaper clippings, financial reports, slides, manuscripts of temperance plays and quiz book contest materials."

Other important temperance materials were received during the year. A Michigan Anti-Saloon League of America, successor to the Anti-Saloon League of America, correspondence, photographs and pamphlets covering the period 1919 through 1950. Important ingredients of the collection include letters of Howard Hyde Russell, founder of the Anti-Saloon League, and Wayne B. Wheeler, considered by many to be the chief architect of prohibition.

FARMINGTON ROAD IS PAVED RIGHT TO OUR DOOR

Farmington Road is now open south of Schoolcraft to our yard.

WE DELIVER — NO MINIMUM ORDER

Notice of Restrictions in the Sale of Natural Gas by Consumers Power Company

The Michigan Public Service Commission, because of a shortage in natural gas supply and to protect service to existing customers, has authorized Consumers Power Company to impose certain restrictions on the sale of natural gas to existing and prospective customers, and has directed the Company to publish the essential portions of the Commission's order. These are:

1. All commitments and applications for future residential service, including apartments and mobile homes, existing on the date of the Commission's order (November 9, 1970) are voided.
2. No new commercial or industrial customers shall be added to the Consumers Power Company system. However, commitments already made to existing commercial and industrial customers will continue to be honored. The base period to measure commercial and industrial loads shall be the 12 months ended June 30, 1970 or the amount of the commitment if a new customer.
3. No new residential customers or additional residential space heating loads, including apartments and mobile homes, shall be added to the Company's system, except as follows:
 - A. Persons who had installed gas space heating equipment, or were in the process of installing gas space heating equipment on October 1, 1970, shall be given first priority on remaining gas supplies, provided that such persons otherwise qualify for gas service in accordance with the Company's standard rules and regulations. The right to obtain gas service in accordance with this provision shall lapse unless Consumers Power Company is notified in writing of a desire for gas service prior to December 15, 1970.
 - B. All other persons desiring residential gas service, including service to existing residential units, and new construction, must make application in writing to the Company for such service.
4. Applications for existing residential units may be made at any time. Applications for new residential construction shall be made after the footings and foundation walls are completed at the location desiring gas service or, in the case of mobile homes, after the concrete slab is poured.
5. Consumers Power Company, as soon as practicable, will verify by field inspection that the residential units are in existence or that the required construction is completed, and upon such verification will issue a dated commitment. Thereafter, the Company is directed to make a second field inspection in not less than 80 nor more than 100 days. If construction has not proceeded to completion of the framing and roofing of the structure the Company will advise the applicant that he has 30 days in which to carry construction to that stage of completion, or the permit will be irrevocably canceled. In any case, gas service must commence within 12 months of the original date of issuance, or the commitment will be voided. Dated commitments are applicable only to the locations specified, and may not be transferred to any other site.
6. Owners of buildings now receiving gas service in a building which is torn down because of public improvements, may transfer such gas service for the same uses to another location owned by such person, provided the transfer is completed within 12 months after discontinuance of service at the original location.
7. The procedures set forth in paragraph 3 hereof shall be followed by the Company until such time as its total confirmed estimated connected annual requirements are approximately 370 billion cubic feet.
