

Overseas Sells The New Ro80

Overseas Motors Inc., 32400 Plymouth Rd., Livonia, has the NSU Ro80 on sale and in its showroom.

The Ro80 features the Wankel engine, a revolutionary power-plant and one that General Motors has agreed to pay \$50 million for the right to manufacture.

Overseas' territory extends from West Virginia to California.

ALTHOUGH THE supply is limited, a spokesman at Overseas reports that 18 Ro80s have been sold during the last several months.

Reports also indicate that a Wankel Ro80 has been delivered to the Ford Motor Co. and that the NSU factory in Germany sold the car to Ford.

"They are testing it and are very surprised at its low emission," the spokesman said.

He said that Ford and Chrysler have nearly completed talks concerning the licensing agreements with Wankel and feels that there will be more cars with this revolutionary engine in the future.

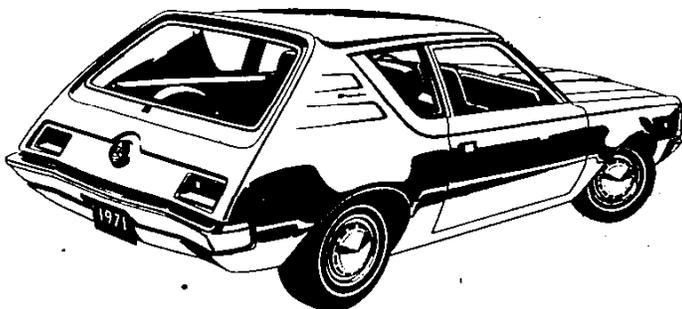

THE Ro80 IS a four-door sedan with a twin-rotor Wankel engine in front and meets the required safety standards and air pollution control qualifications.

The vehicle has an automatic transmission and an engine which uses air injection and thermal reactor exhaust control device.

The price tag on the Ro80 is in the neighborhood of \$6,000.
