**HEAT  
PUMP**

Amana heat pumps operate year 'round to deliver the most for your investment!

Even when it's cool outdoors, there's heat in the air. An Amana heat pump pulls that heat out of the air and 'pumps' it indoors to warm your home. This process is so efficient an Amana heat pump can deliver over 2½ units of heat for every unit of electricity consumed. It's like pulling money out of thin air!

**Add-on Savings.** You can even add an Amana heat pump to your present furnace. A special set of controls sense the outdoor temperature and operate whichever system is more economical, the heat pump or the furnace...so you save on heating costs!

**Efficient Cooling.** In the summer, an Amana heat pump reverses operation to pump heat from inside your home to the outdoors...like a high efficiency air conditioner!

Amana heat pumps are packed with quality features like:

- Powerpact compressor.
- All copper tubing.
- Electrically bonded paint.
- Full factory testing.
