Breast self-examination is easy, takes only a few minutes and can be performed in the privacy of your own home. It's an important way you can detect early and highly curable breast cancer. Through monthly breast self-examinations, you will learn how your normal breast tissue feels and will be able to recognize a change if one occurs. In fact, most breast lumps are found by women themselves.

Take control of your body and your life.

Make breast self-examination a part of your monthly routine. And see your doctor regularly for clinical exams and advice on mammography.

For a free pamphlet about breast self-examination, call your local American Cancer Society.

We're here to help.
