

# Sleek kitchens never cooked so good

**I**F IT'S BUILT-IN, sleek, European and practical for your kitchen, you'll see it at the builders show.

Hawthorne Home Appliances, a leader in built-in kitchen appliances, showcases their tremendous line of European-style appliances. The display will be so varied and large, they're calling it a show-stopper. It will feature all of the newest selections in built-in cook tops, ovens, refrigerators, dishwashers, microwaves and more.

This year Hawthorne is highlighting convection, a cooking method that's been around for years but only recently gained popularity. Convection ovens circulate the heated air in the oven, so cooking time is reduced and food is tastier and more nutritious.

At one time these ovens were a rarity, but with increased consumer demand and an accommodating increase in the number of manufacturers, you'll find that the selection is far more varied than ever before.

**MOST OF THE** appliances Hawthorne carries are produced by

companies in Britain, Germany, Switzerland and Sweden. They're more compact than American-made appliances and are targeted at the higher income brackets.

According to a Hawthorne spokesperson, the hot look in appliances is white on white. But you can still choose from the other colors such as black, and stainless steel. They'll also show you how to achieve that European look for your kitchen by adding just a few items if you're not in the market for an entire line of appliances.

What inspires a cook to cook? A great cooking area. You can pick it out yourself from the sleek, European kitchen appliances at Trevarrow Inc. The technology and designs that went into producing Trevarrow's built-in stoves, refrigerators, ovens and sinks, represent a quantum leap from the ordinary into the realm of extraordinary.

A Trevarrow kitchen sink, for instance, isn't just functional, it is a work of art. Refrigerators don't just keep food cold, they discreetly maintain it in anticipation of its supreme

Always a big attraction at the builders show are kitchen booths — like this one by Trevarrow at last year's event — displaying the latest in appliances.

purpose. Ovens and cooktops don't just cook, they enhance the creative culinary process, elevating it to a higher plane. These kitchen appliances are for people who love to cook!

New on the market is the European solid disc element featuring electric re-

sistance wires embedded in a flat cast iron cooking surface. It's slightly raised from the surface of the cooktop, surrounded by a spill ring and sealed to the cooktop so there's no need for a
