Right to Be Peevish Mark Twain's friend and physi-cian, Doctor Rice, tells the follow-

'Mr. Clemens was well acquainted with the theater, and knew many actors. One of these, who was a member of the same club as Mr. Clamens, was called to attend the funeral of a near relative.

"It was in the winter time—the

actor was shy an overcost, and he looked enviously on several belong-ing to Mr. Clemens, which were hanging in the club locker room. He made bold to ask the loan of one and Mark Twain kindly assented.
The funeral ceremony seems to have been prolonged, for the overcoat didn't reach home for some weeks.

"When Mr. Clemens wore it for the first time he explored one inside pocket for some manuscript. It was not there, and out came a cuss not there, and out came a cuss word; his hand in an outside pocket failed; to find one of his many knives; and his exclamations grew stronger. One more attempt to find cigars, which he always carried in several pockets. Another failure. It was too much, and he sadly remarked, 'Well, I hope that d-n fu-neral was a failure.'"

Odd New Titles
Lieut. Com. Richard E. Byrd, who flew over the North pole, is the

ipient of America's most recently recipient of America successful and the created honorary title. It is Doctor of Longitude and Letitude and was conferred on him by the Americanhical society. Among was conferred on him by the Amerjan Geographical society. Among other unusual degrees in this country are those of Professor of Plumbing, at the Carnegie institute; Diploma in the Art of Profess of Whistling, conferred on Missing, conferred on the Captain of Hospitality at Captain and Marian Captain and Captain and Captain C vard's Diploma in Dramatic Writ

Class to Develop Reading

A professorship of books has been established in Rollins college, Win-ter Park, Fla., and an author, edi-tor and publisher was appointed to tor and publisher was appointed to the chair. A fireplace and com-fortable chairs will replace the usual classroom furnishings and lec-tures on books and book making, with informal discussions in class, will take the place of formal lec-tures. The course is intended to develop reading habits in college stu dents that will be lifelong.

Giant Ferry Boats

The largest ferry boat in the world is probably the Pere Marquette of Lake Michigan. This ferry boat has a capacity of 80 care; length, 350 feet, been 26 feet. length, 350 feet; beam, 36 feet; depth, 36 feet; displacement, 4,200 depth, so feet; displacement, 7,000 tons. The Baikal Trans-Siberian ierry and some of the car-ferry barges of New York probably are next in rank to the Pere Marquette.

Mirrors in Profusion

More mirrors than employees were found in one government building, in the course of moving a government bureau's office in Wash ington, according to a public buildings commission report. There were 241 mirrors listed in the moving report, and the employees, male and female, were fewer than this num-

Easy-Going Crime Fighters
Th historic city of Nuremberg, long noted for its leniency in dealing with criminals, has run true to the old saying, "The Nurembergers hang nobody." Paul Gemeinbauer, an assistant city treasurer, sought by the police of the whole country on a charge of embezzling 835,000, returned from Holland and gave himself up at the detective bureau at 11 p. m. A police lientenant in an adjacent room sent Gemeinbauer away, saying the detective bureau was closed for the night. Returning at 7 a. m., he was told he had come too early.) He says he had to announce himself three times before he was arrested. Easy-Going Crime Fighters fore he was arrested

Electric Signs on Clouds

Electric Signs on Clouds
A new development in electrical
advertising paints a message in colors upon clouds. A manufacturer in
Oakland, Califf, has announced a
device projecting beams of colored
lights from powerful electric lamps
which form letters legainst the lowhanging clouds. So efficient are
these projectors that the letters and
figures are clearly defined even
through the rain and fog of a
stormy night. Beautifully colored
advertising messages at night may
by this process become a fitting
parallel to sky writing in the daytime by airplanes emitting smoke.

The Doctor's **Dilemmas**

And Eald was quite enough to trou-ble anyone and had succeeded, at her eighteenth year, in driving her lovely mother to the very borders of nervous

ble anyone and had succeeded, at any eighteenth year, in driving her lovely mother to the very barders of nerrous prostration.

I And because, beneath her selfish exterior, there was the making of as charming a woman as her mother was, Doctor Savage felt, unable to cope adequately with the case. Had he discovered the selfishness before he became a victim to the charm. Its way would have been the charm is way would have been the case. I had a fine selfishness was the one characteristic, that a door's wife most certainly must act have—the roblem was a versual door's wife most certainly must act have—the north could be a supposed to the head of the control of t

"Exactly!"
"Rather a tall order, my boy."
"the third is though."

Both."
When Doctor Ward made his first

"Both." said the young doctor.
"Both."
When Doctor Ward made his first appearance in the sick-room in place of the young man, Enid pouted quite frankly but in the eyes of the mother sprang a look of relief as if unconsciously her troubles had leapt from her own shoulders to:those of the big kindly doctor.

And he had not been on the case a week before he took the daughter aside and talked to her like the proverbial Dotth uncle.
"Now look here, young lady," he said in his kindly but none the less determined way, "you've got to be a bit more considerate of your mother's views of what is good for your welfare. Do you ever stop to realize that your mother has lirted trenty years longer than you have and that she knows rolumes more than you?" "Mother's old-finishoned," slarted Enid, but the doctor's voice interrupted her.
"Thu fort old-finishoned enough to be driven into serious illness by her own daughter—is soft in the serious illness by her own daughter—is soft in the serious illness by her own daughter—is soft your wom mother's nerve force by continual disobedience to her wishes. She quite naturally seed no vitrues developing in you through dancing halt the nights, wearing only half enough cares with the general way and are a well-dener and are would are not the general care with and are would are a well-deneral are well-deneral area.

quite naturally sees no virtues deveroping in you through duncing half the nights, wearing only half enough clothing and running around—I think most sensible people would green with the control of the

real, true woman is beginning to—we sprout."

"And you'll help me to grow—more like my mother?

"It wan't take long at this rate," laughed Doctor Ward and felt very much elated—so much so, in fact, that when he and his young partner met at dinner he told him all about it.
"Do you think so sudden a change will be lasting?" questioned Doctor Savage carnestly but with much hope in his eyes.
"If she fails in love with the right

will be histing, questioned Destange carried but with much hope in his eyes.

If she falls in lore with the right man now—an the stage of the game think as the wellow into a semi-blook of the same the woman ber mother is," one in lughed Savage, "is it so impossible to reach the same state of perfection us—" "My bow," nut in Doctor Ward with a twinkle in his eye but with so much hat was deep and without in his voice is to make the younger man's dreams take paus—in their flights into fature happiness, "if there were many women in this world like fars, Welker—we men would be a much finer lot than we are." "Them—" "Exnet! Now that our patient is "Exnet!" Now that our patient is

"Th

Town of Verkhoyansk Earth's Coldest Spot

Earth's Coldest Spot Most people, if asked to name the coldest spot on earth, would hazzard a guess that it would be found somewhere in the polar regions, writes S. Leonard Bastin in St. Nicholas. As a matter of fact, temperatures have been recorded in Siberia which are much lower than those ever observed in the neighborhood of either of the poles. For instance, during the forty months' expedition in the Arctic, carried out by the Amundsen polar expedition ship Maud, the lowest temperature recorded was 51 degrees below zero have oeen recorded in Stocia which were much lower than those ever observed in the neighborhood either of the poles. For instance, during the forty months' expedition in the Arctic, carried out by the Amundsen polar expedition ship Maud, the lowest temperature shere corded was 51 degrees below zero Fahrenheit. In the Antarctic, the lowest temperatures have not been much in excess of, this figure. In Siberia, a remarkable thing is the bostess.

Fahrenheit. In the Antarctio, the lowest temperatures have not been much in excess of, this figure. In Siberia, a remarkable thing is the enormous increase of cold toward the cast.

East of a line drawn from the mouth of the River Ob to Lake Baikal, the subsoil is always frozen even in the height of summer. In the northern part of this immense region is the town of Verkhoyanek, which is the world's coldest spot. In January the average temperature is minus sixty degrees Fahrenheit, so that, between the two extremes, the mercury in the thermometer actually moves 120 degrees.

Caught Rare Butterfly
In a recent investigating tour of Jamaica Doctor Maxon of Smithsonia institution was able to capture a rare butterfly, the Papilic Homerus, found only in the hills of Jamaica, having a wing spread of more than six inches and regarded as the most beautifully colored butterfly in existence. The specimen will be the only one in perfect condition owned by any museum.

Actors Beset by Perils
Snakes, moeguitoes and tigers as among the perils encountered by South American motion-picture folk as they travel on mules through the jungles to suitable settings for the romantic films they produce on the southern continent, according to Don Juan Ferre of Bogota, Colombia, who has played the lead in many South American pictures, says the Los Angeles Times.

Let's Drive the Poultry Thieves out of Michigan

Stealing chickens, ducks and turkeys from the farms of this State has proven so profitable that we are fighting an organized gang of bandits who use motor trucks to rush their spoils to city markets. It has got to stop.

The Michigan Business Farmer has set aside ONE THOUSAND DOLLARS (\$1,000.00) to be maid in rewards to anyone.

FIRST REWARD

PAID
Frank Watkins, R. 2,
Holly, Michigan, was
paid the first reward
under this offer. The
thief he caught served
30 days in the Oakland county jail and
paid \$85 fine. Frank
has \$50 to show for
ridding Michigan of
one poultry thief.

DOLLARS (\$1,000.00) to be paid in rewards to anyone, including state and county police officers, who secures the evidence and conviction of poultry thieves who steal chickens, ducks, turkeys or guinea fowl from its subscribers

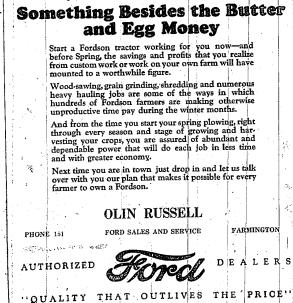

If You Are a Poultry Raiser
