

# Farmington School News

**Pep Meeting**  
The High and Junior high schools held a pep meeting in the

"You said it, Boy, it's the finest food for little boys who want to become great, big strong men."  
—says Billy Break O'Day.

assembly room. This meeting was under the supervision of the Student Council who have started a system of well organized support for the teams.

Miss Boorman, Mr. Crawford and Supt. Leonard each spoke for a few minutes about the importance of school spirit and what the teams mean to us. Cedric Harger led in a practice of cheers and Miss Lockwood led in singing.

A much more extensive method of advertising is also being worked out. Through the help of the Council many more people attended the basketball game between Northville and Farmington last Friday night than any other game of the season.

Farmington High School pupils were guests of the Farmington Baptist Church Sunday evening, February 20. Rev. Palmer, pastor, spoke to us on "Youth." Gladys Wobd gave two selections on the guitar, "The Lost Chord" and "The End of a Perfect Day." Allan Killom read the Scripture lesson and Supt. A. G. Leonard led us in prayer.

**Girls' Basketball**  
Farmington girls hold first place after winning the hardest game of the season. The score was 22 to 27 in favor of Farmington. The Farmington girls met Northville last Friday night at Farmington. Both teams had not lost a game so it was very exciting. Kathryn Banfield started the

game right making the first basket for our side, but the quarter ended unfavorably for Farmington, the score being 9-3. The half was still more discouraging, 17-11 in favor of Northville. Both teams went on to the floor at the end of the first half with renewed vigor. Amid the wild cheering of the crowd our girls steadily gained on Northville. At the end of the quarter the score was 25-23 still in favor of Northville. The last quarter was the hardest of all. The guards were on their toes to intercept passes and the forwards were quick. At the end of the game the score was 32-27 in favor of Farmington. On the south bleachers were twelve students who held blue and white cards forming a fan. Between the halves Cedric Harger played the banjo and sang.

The lineup of the victors was as follows:  
Kathryn Banfield, l. f.  
Kathryn Murphy, r. f.  
Avis Goers, r. c. Captain.  
Mildred Adams, j. c.  
Stella (Red) Vanderburg, r. g.  
Waneta Arms, l. g.  
Substitutes: Ellen Perry, Mildred Graham, Kathryn Rupert and Shirley (Speed) Zwahlen.

**Boys Basket Ball Game**  
On Friday night the 11th Northville played here against our team. The second team were defeated by a score of 2-14. After the girls' game the first team boys were defeated. If the boys had beaten Northville they would have tied for second place in the league, but now have no chance.

**Assembly Meeting**  
We were very glad to have as our assembly speaker last Wednesday morning Rev. E. W. Palmer. He gave a very splendid talk on "Winning the Master's Degree." It gave us the thought we were not only responsible to ourselves but to others, also.

**L. Austin**  
**Kindergarten**  
We have decorated our room. We have been making soldier hats and learning the first verse of America.

**First Grade**  
We are progressing with the making of our grocery store. The B Class is reviewing the stories in their primer.

**Second Grade**  
We are very happy practicing for our play which is to be given at the Town Hall.

**Opportunity Room**  
Betty Mohring and Edward Baker are our champion spellers. We are reading stories about George Washington.

**Third Grade**  
We have begun a new study in

geography. We are studying "The Food We Eat."

We enjoyed a Valentine party last Monday. Miss Ackland.

**Fourth Grade**  
We have been making houses out of boxes and papering them and making furniture.

We are still working on our map book and are writing stories on New York City.

We are making reports on George Washington.

We had a Valentine party last week which we all enjoyed.

Harry Lapham was our representative to the Council. Miss McClellan.

**Fifth Grade**  
We have two teams, the Red and the Blue. The Reds were ahead but now the Blues have overtaken them. We count our lessons and conduct. Miss Beebe.

**Sixth Grade**  
We are decorating cut hangers. We are writing essays on the life of George Washington. We have finished the study of the crusaders. Miss Thornton.

**Seventh Grade**  
We are studying the history of Michigan. We are now on the History of Detroit. Most of the work is Library work.

We still find spelling very hard but hope to do better. Mrs. Bartlett.

**Eighth Grade**  
In order that we may use better English we have organized an English club. In Health Class we are learning how to be useful and make beds. The History club had a "George Washington" party on Monday. Miss Tapio.

**Sophomore Class**  
The Sophomores have started their new sets in bookkeeping and think it very interesting.

**Freshman Class**  
The Freshmen are interested in the "Adventures of Ivanhoe" in their English Class. They are also waiting and watching for 4 o'clock to come.

**Junior Class**  
The Juniors are quite busy with their class meetings and helping the Seniors now and then. The Juniors are also helping the Seniors make money by eating their candy.

**Senior Class**  
The Senior Class is busy selling tickets for their play, given on the 23rd and 24th of this month. They are very excited over it and hope, the people will enjoy it.

**Morse's Two Valuable Contributions to World**  
The "father of American geography," strangely enough, also was the father of the man who invented telegraphy. His name was Jedidiah Morse. Born at Woodstock, Conn., in 1761, he died at New Haven in 1826, several years before his illustrious son, Samuel F. B. Morse, started the world with his invention. Doctor Morse was one of the busiest men in New England, writes Quaker O. Taylor in the New Republic. In 1784 he published "Geography Made Easy." This was the first work of that kind published in the United States. Subsequently he published "American Geography," and "Elements of Geography." An age-yellowed copy of his "Geography Made Easy," is preserved in the library of congress at Washington. —Kansas City Star.

**Friction of Air Turns Meteorites Into Dust**  
The so-called falling and shooting stars are not stars at all, but merely meteorites. Scientists know nothing about their origin except that they do not come from the earth and that they are flying around in space. They are sometimes composed of iron, but more usually of rock similar to that found on the earth. Most of those which fall upon the earth are very small, although a number weighing several tons have been found. They can be seen except when they are upper atmosphere. The friction of the air is so intense that the meteorites are usually reduced to dust in this phenomenon which produces the streaks of light popularly called shooting stars, falling stars, or fireballs. —Pathfinder Magazine.

There isn't much you can do about an artistic tempo after the victim is too spank.

## Fishing by Arc Lamps Is Found Profitable

In the belief that large fish are attracted by lights, deep-sea fishermen are more and more using arc lamps in their work. The Marine Biological association of England has been making tests with arc lamps from one of its ships. When the light first blazes out tiny worms begin to congregate near it in huge numbers. Small fish then appear, followed by larger fish. What really happens, says one of the experimenters, appears to be this: "Worms are not necessarily attracted by the light, but on passing into it they think day has come, and they stay in the neighborhood of it. Tiny fish come up to eat the worms, larger fish are attracted by the smaller fish, and finally the biggest fish in these waters are to be seen circling round for an opportunity to devour."

This thing is getting too much like a tragedy. Charlie. Do something funny.

## NO RHEUM FOR RHEUMATISM

**ALWAYS RESULTFUL!**  
With so many other rheumatism remedies on the market, why do most folks call for No-Rheum? Light because No-Rheum is always resultful and bears the endorsement of thousands who have experienced quick and lasting relief from this most painful of human ailments. ## No other low-priced six will ever give you this

It is not beyond the realms of possibility that some day there will be offered a newly created six, closely approximating in basic design and price the Pontiac Six as introduced a year ago.

of miles of actual service in the hands of thousands of owners. And that is essential, even in a car which was tested and developed as the Pontiac Six was for over three years prior to its announcement!

But even if that car does make its appearance, it will lack one powerful inducement to ownership that is of paramount importance in contemplating the Pontiac Six:

Design and construction so convincingly demonstrated to mean more than the elimination of fundamental weaknesses. It means peace of mind from one year's end to the other—and that is what buyers have a right to get, no matter how much or how little they pay!

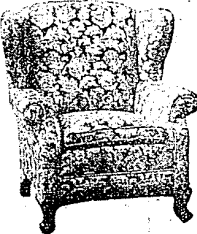

Its design and construction will not have been proved by millions

Pontiac Six, \$825 to \$975. Oakland Six, comparable to Pontiac Six, \$1025 to \$1195. All prices as factory. Bodies by Fisher. Easy to pay on the Liberal General Motors Time Payment Plan.

## There IS a Difference in Chairs

Two chairs may look equally well on the showroom floor—they may "sit" equally well. It's how they will look and how much of their soft comfort they will retain a year from now—ton years from now—that interests the careful buyer.

Into Globecraft chairs only the finest hardwood goes the best springs, webbing that lasts, stuffing that stays soft, coverings that wear—all assembled by workmen proud of their work. That's why Globecraft chairs last and last. They're worth looking into.
