**EDITORIAL**

**JUNE—A MONTH FOR FORETHOUGHT**  
So many activities occupy our thoughts during the month of June that we are apt to overlook a most serious problem which appears at this time every year. Graduations, weddings, outdoor affairs—all claim their share of attention. But communities such as ours should give serious thought to the great menace which comes with the closing of schools. That is the tremendous increase in traffic accidents occurring every summer in communities situated on heavily travelled roads.

The closing of schools releases hundreds of eager, lively children, ready for romping and playing. They are heedless, in most cases, of the danger that lurks in the streets and highways. The coming of summer also brings to and through communities such as this, hordes of visiting motorists. Some are bound to and from their summer cottages, others are on vacations. All appear to be in a hurry.

Now is the time to consider means to save the children of the community from the motor menace. To do this, it is not necessary to insist on ridiculously low speed limits, nor to acquire for the community a reputation of being "unfriendly to motorists." It is only requisite that motorists be impressed with the fact that traffic laws here are enforced for the purpose of making our streets safe for pedestrians amid the maze of summer traffic.

A little time and thought invested now might result in the saving of life and limb. One accident is too great a penalty to pay for lack of forethought.

**WORDS OF WISDOM**

Running too little advertising is like sowing too little seed. A farmer planting corn puts four or five kernels into each hill, and is satisfied if two or three good, healthy stalks come from each planting.

It's the constant advertiser who attracts attention. His succession of offerings cannot be ignored. He knows that eight quarter-page advertisements published in succession will bring more than a single two-page spread.

Nor can all the results to be obtained from advertising be expected the day following publication. Time must be allowed for the seed to sprout, grow, ripen and be gathered in.

Constant advertising will bring success to any sound business, be it large or small.—Exchange.

**DO YOUR PART**

The determined effort of stock insurance companies, both fire and casualty, to reduce needless waste of property and loss of life as the result of preventable fire and accidents, should be supported by every individual, manufacturing plant and public official in the nation. Fire and accident prevention is a cause in which all can join with mutual benefit.

**NEWSPAPER FIDELITY**

"A newspaper attains its greatest usefulness to its advertisers only when it is steadfastly faithful to its readers. When it sacrifices its independence or other interests, it sacrifices its readers' trust in the integrity of its columns—and thus kills the thing that profits the advertiser most."

**"CAPTAIN LINDBERGH"**

While the world's a-talking,  
And singing praises loud,  
A little mother's waiting  
And of her boy she's proud.  
Braving all the wind and snow  
Above a raging sea,  
A boy just flew to Paris  
A conqueror to be.  
He surely is a hero  
He performed a wondrous feat  
The world is proud in saying;  
"Captain Lindbergh can't be beat."

M. Marie Walling.

What has become of the old-fashioned housewife who insisted on paying cash?

**PHONE COMPANY KEEPS PACE WITH TOWNS' GROWTH**

Tying many of the progressive communities of the southeastern section of the state closer with the city of Detroit, because of their mutual industrial and social interests, the Michigan Bell Telephone company is pushing the construction of additional toll and long distance circuits. Closer business relationships between these communities and the city is reflected in growing use of the telephone. It is declared by Hoy E. Crowe of the Telephone Co.

Incidental to this program, the Michigan Bell is spending approximately a third of a million dollars additional in Northville, Farmington, Plymouth and Redford. So rapid has been the growth of this group of communities that the telephone company has, in several instances, advanced work planned for farther in the future.

The year 1926 marked the expenditure by the company of about \$430,000 in Redford and Plymouth and the work now under contemplation for this year in no way overlaps that program, which has been completed.

New central offices were placed in service at Redford, December 18, last, and Plymouth, September 28, last.

Certain sections of the Farmington exchange are experiencing similar growth particularly along the Farmington road where many new homes are building. Three new circuits were built to serve the Farmington road section last year and 51 more are being added at a cost of \$11,562.

By fall a network of new toll circuits will be completed between the Farmington, Redford, Plymouth and Northville central offices, to care for increasing toll service. An estimate providing for nine new circuits, at a cost of nearly \$15,000, has been approved by Michigan Bell officials and the work of installing them will be started next month, to be completed in November. Two new circuits will connect Farmington and Redford, another will connect the Farmington and Northville central offices and three will connect Farmington with Detroit. Three new circuits also will be added to the Northville-Redford group.

**MY COUNTRY**

When it shall be said in any country in the world, "My poor are happy; neither ignorance nor distress is to be found among them; my jails are empty of prisoners, my streets of beggars; the aged are not overtaxed; the tax is not oppressive; the rational world is my friend, because I am a friend of its happiness." When these things can be said, then may that country boast of its constitution and its government.—Thomas Paine.

**Commissioners' Proceedings**

**"Let the car itself reveal the meaning of super-precision construction"**

Perhaps you are not mechanically inclined... Perhaps you are one of those practical persons who ask not "how?" but "what?" And if you are, drive the Greater Oakland Six! Let the car itself reveal the meaning of super-precision construction! There's something thrilling in the way it darts ahead when you step on the gas; something re-

assuring in how it conquers hills; something strangely restful in its handling ease and freedom from vibration... You feel instantly. It's the difference that always results when advanced engineering is combined with super-precision construction. One demonstration will tell you all—come in and get it today!
