**MS** from page 13A

When the MS Society made the call, Altschul was there. When he needed them, they provided help. In addition to the Huesga program, the MS Society helped Altschul obtain computer equipment for his business, which makes his job less physically demanding.

Altschul doesn't look at being diagnosed with MS after years of helping support other sufferers. He thinks it may be something else.

**Cancer hits a lot of men below the belt.**

One in ten men will develop prostate cancer.

If you're a man, you're at risk for prostate cancer. Prostate cancer is the most common cancer in men and the second leading cause of cancer death in men. This disease hits an estimated 165,000 men annually and takes around 35,000 lives each year. About 80 percent of these deaths may be preventable with early detection.

Screening exams are able to detect prostate cancer when it's the most treatable. An annual exam can detect an enlarged prostate, one of the symptoms of prostate cancer. Health Development Network at Botsford Center for Health Improvement offers a yearly prostate screening and other programs for men over forty.

A prostate screening could save your life. If you would like more information, call Health Development Network at (313) 477-6100. If you would like a physician referral, please call Health Match at 442-7900.
