# Cutting autoworker pay offers society mixed bag

DAN crossed my mind mcCOSH as I fished for pots in the hot

water.
Today, the ratio hasn't changed much, although the U.S. auto wage rate has slipped from first to

mid-pack among the top ten industrial nations. Take-home pay has multiplied by a factor of five since the 1960s, as has the minimum wage, which not surprisingly tracks with new-car prices as well.

well.

Medical costs, housing, taxes, social security and most public sector jobs have far outstripped the take-home pay of the average autoworker, even as total employment dwindles. The casual, easy

money at the plant gate is pretty much gone forever. Needless to say, this is not a good time to be negotiating a la-bor contract, despite the short-

sion in the 1830s.

GM's proposal was cloaked in something that has been accepted in other industries — namely offering lower pay for now hires.

Still, if it were accepted it would mean a lower pay base for the entire industry, and make the U.S. the only country in the world where a major heavy industry presents a dwindling standard of living to its workers.

All this is against a background

Also, I've never quite under-stood the basic philosophy pur-sued by the UAW of paying such high base labor rates for unskilled labor, with so little premium for

highly skilled jobs that take years of training. After a four year apprenticeship, or even an associate degree, you only get a few bucks an hour under the current pay structure. Lowering the rates for entry-level jobs could well be long overdue.

That, of course, would mean restructuring the pay rates for the whole corporation, and by exten-sion the whole industry — a diffi-cult, if not impossible task.

what's left for those leaving and-reducing the pie for the future generation. Even more ironic is the notion that the same future generation is expected to shoulder the debts and social debris that is left behind.

## Pet from Next page

Like most new offerings, Medi-pet became popular along the East and West coasts before mov-ing inland.

### Two different plans

"When an emergency does arise people always say they wish they had medical insurance," said Jeff Dizik, a veterinarian for First Vet-erinary Clinics of Michigan, which is based in Southfield and operates area clinics in Novi, Ro-chester Hills, Southfield and

"Pet insurance does work, but people have to make an initial payment. There is another insur-ance plan (VPI), which began sev-eral years ago in California by a group of veterinarians. Both pro-grams are becoming more wide-

spread. Insurance does have a place in the market."

Medipet offers two plans. The first, Silver Tag, provides lower annual deductibles (\$150) in return for coverage limits totaling \$1,000 per injury or lilness. Annual premiums are \$129 for pets three months to nine years old or \$210 for pets 10 years and owner.

The Gold Tag plan, meanwhite, provides higher coverage limits (\$3,000 per injury or lilness) with a higher annual deductible (\$300) and a lower premium — \$39 for pets three months to nine years old a \$99 for pets 10 years or old.
