Astral 2: Designed for a sloping lot, this 1,883 square-foot Landmark plan is highlighted by extensive front and side decking that leads into a huge central living area.

The Astral 2 is an unusual design with a compelling exterior complemented by maximum use of interior space.

Designed for a slightly sloping lot, the house would serve equally well in the city or the country.

One of the features that allows for a striking contrast of angled vertical lines with the more linear horizontal lines of the side wings.

Extensive front and side decking gives access to the great room in the main living area of the house.

At the center of the vaulted great room is a six-sided hearth with a central wood stove, which provides separation for the various areas.

The dining area is in the lower angles next to the kitchen, which has a breakfast bar, large butler's pantry and a food storage area.

The central area has a large utility room.

The left wing of the house contains two bedrooms and full bath plus entry to the two-car garage. The master suite is in the right wing.
