

Dear Mr. President and Mrs. Clinton:

# We've developed a Primary Care Network<sup>TM</sup> dedicated to providing preventive care.

At Botsford, health promotion and self-management of illness has always been, and continues to be, central to our approach to patient care. Many silent illnesses such as heart disease, diabetes, high cholesterol and hypertension may be controlled with early diagnosis.

We have built upon our philosophical foundation with a Primary Care Network of physicians who are dedicated to providing comprehensive health care for the entire family. Our most fundamental activity is to offer personal, compassionate care for life. We believe only dedicated professionals can provide care that considers the entire person—taking into account an individual's needs and concerns.

Botsford General Hospital is committed to a healthy future. Preventing illness can save millions of health care dollars every year. At Botsford, we believe that making a difference starts in our community.
