Try serving fried sausage cakes and fried canned pineapple, one above the other. The tartness of the pineapple offsets the rich flavor of the sausage.

Salt and other seasonings draw out meat juices and mask the flavor. When broiling steaks and chops at home, sprinkle salt on them just before serving. Large roasts may be salted when about half done.

A very dilute solution of gelatin, made by dissolving 1 ounce of gelatin in a pint of water and finally diluting this solution 8 to 15 times, is an excellent dressing for silks, wool, and cotton materials such as organdies, voiles, and batistes.

To keep a fruit cake in good condition wrap it in waxed or parchment paper after it is entirely cold, and place it in a tight container. Some people like to put in with the cake an apple cut in half or a piece of cheese cloth saturated with cider. Look at the cake from time to time to see that no mold is appearing.

Although the opportunities for buying attractive ready-to-wear garments are constantly increasing, a large number of women are doing much of the family sewing at home. In connection with a recent survey of the present trend in home sewing a surprising number said that they sewed because they enjoyed doing so, and not especially because they expected to save money.

Velveteen is a cotton fabric of suitable weight for fall and winter dresses. It comes in dark and medium colors, which may be relieved by lighter, washable, collars, cuffs, vests, or other accessories. Corduroy, which is similar to velveteen except for its ribbed surface, can be used in much the same way.

Children over three years old should have garments with a front opening to make self-dressing easier. Buttons should be fairly large in size and buttonholes should be firm. It is a good plan to reinforce bands where the buttonholes are to be worked. The buttons should be sewed on firmly and should have a long shank.

Baked bananas are a good mid-winter dessert. Skin six bananas, scrape them lightly to remove any stringy portion, and split in half lengthwise. Place in a buttered shallow baking dish, and pour over them a sauce made of 1-3 cup sugar, 2 tablespoons melted butter, 2 tablespoons lemon juice, 1-3 teaspoon salt. Bake in a hot oven until brown.

The first step toward remodeling an old kitchen is to think out a plan that considers the work to be done, how space equipment can be efficiently arranged, and the relation of this room to the rest of the house. Careful planning will sometimes show that good results can be accomplished by regrouping equipment, providing two sets of some of the smaller pieces, and refinishing the floor and painting the walls a lighter color.

Some silks and wools are spotted by water which dissolves a part of the weighting or finishing substance and leaves a ring. Some times these rings can be removed by scratching with the finger nail or rubbing with a stiff brush. Another method is to dampen the entire surface of the material by sponging with clean water or by shaking in steam from a briskly boiling teakettle, and then pressing while still damp. Still another method is to dip the entire garment in carbon tetrachloride, gasoline, or other solvent. Gasoline, however, should be used with caution because of the fire risk.

High Compression—Long Life Motors &
An Amazing Price

THE SEDAN, 4-Doors, in two shades of blue, with cream striping, is larger and roomier, with four fitting seats, wider doors, rich upholstery and appointments.

\$795

THE COUPE has wide seat, ample luggage space in the rear deck, and a comfortable leather rumble seat which is removable.

\$775

THE COACH is longer, wider, roomier—a full size five-passenger Super-Six, as distinctive in appearance as it is practical.

\$735

f. o. b. Detroit, plus your excise tax

One look at the new Essex Super-Six will convince you that it will excel in popularity the Essex which has just completed the most successful year ever achieved by a six-cylinder car.

From radiator to tail light it is a smarter, more beautiful car than even the Essex which preceded it. And in performance it surpasses in smoothness, reliability, speed and ease of handling, the standard Essex owners are so proud to acclaim.

You get an impression of completeness and fine quality in the design of every detail. From the new pattern Colonial lights—the higher, narrower radiator with vertical shutters—the heavy sweeping fenders—the rubber-covered running boards—the improved steering mechanism and the steering wheel similar in design and construction to that now used on the very latest and very highest priced cars—there is outstanding reason for pride.

With all these advantages, there is also an amazing price reduction. The Sedan at \$795 f. o. b. Detroit is \$40 below the Sedan price of last year.
