Gain of 52,000 jobs in county by end of '95 forecast

BY RALPH R. ECHTINAW

Three University of Michigan economists, in their eighth annual forcest, predict that Oakian County will gain 52,000 jobs by the end of 1995.

Some of the jobs will be new jobs, but many of them are expected to be moved into Oakiand County from somewhere else. For example, Chrysler is supposed to move thousands of current em-

ployees to its new engineering center in Aubum Hills. In the survey these count as "new" jobs because they weren't physically located in Oakland County before. If the economists "figures are accurate, Oakland County will account for half the private-sector job growth in Michigan over the next two years, despite having just 17 percent of the state's private employment. But again, some of that "growth" comes from

existing jobs that are moved into Oakland County.

The economists, George Fulton, Donald Grimes and Peter Nicholas, have a pretty good track precord in predicting job growth. Since 1986, the first year they made a prediction for Oakland County, the economists forecast for job growth has been no more than 4 percent off.

U-M is paid \$22,000 a year for this forecast by the National

Apsional services, with this Industry's employment expected to reach 117,000 by the end of 1995, more than triple its size in 1979. About 22,000 by gains are expected in service industries, for including 8,000 in retail, 4,000 in finance and 3,000 in construction. No growth is expected in transportation, communication and utilities.

County Executive Brooks Patterson had a press conference

Tuesday, April 19, to announce all the happy news, "I'd like to take credit for the strong economy in Oakland County," he joked.

A reporter asked Patterson and the economists what this forecast, means to typical county residents. "If they're unemployed and living in Oakland County, it indicates they should look for a job in Oak-land County," Grimes sald.

Hills woman honored by franchiser
