MORE THAN MONEY

SID MITTRA, PH.D.

Life insurance: Replacements require thought

People's financial situations do change, requiring the replacement or cancellation of old life insurance policies. However, both actions require a careful analysis of all the relevant facts and hence should be handled with care.

Policy replacement

Comparing old life insurance poli-cies with new ones can be a difficult chore. The decision to replace - or switch - an old policy must be made after a careful examination of all relevant facts

switch — an old policy must be made after a caroful examination of all relevant facts.

Here are some steps you should take to compare, and possibly to replace, old policies:

You need professional help, so talk to a financial planner, or a new insurance agent. But be careful — the company that issues new policies must not only provide better premium rates but also should be a good solid company.

The basic information on any policy is the 'ledger statement' showing present and future premiums, cash and surrender values. Your financial planner should get a statement from each company and surrender values. Your financial planner should get a statement from each company and make sure it is explained to you.

Figures from the ledger statement from the basis for calculating comparative rates of return — a complicated process. Dr. Joseph M. Belth, professor of insurance at Indiana University, has processed a do-it-yourself formula. To obtain it, with instructions, send \$2 to the Insurance Forum, P.O. Box 255-8, Ellettsville, IN 47429. Ask for thoun 1982 issue.

Don't switch to a new policy unless you are in excellent health.

Before cashing in an old policy, ask the company how much, if any, of the cash-surrender value will be taxable—a very important consideration, especially if you are in a high tax bracket.

If the old policy and the new one appear to be comparable, in most instances it would be advisable to keep the old policy. The new policy must offer substantial improvements before you consider buying it.

Make sure your financial planner or agent clearly demonstrates to you — in the form of comparative data — the value of switching before you make your move.

your move.

Finally, ask your financial planner
the implications of replacing your old
policies with new ones on your total
financial plan. This may affect your

Policy cancellations

Cancellation of a life insurance poli-cy is a serious matter because, after

Local labor force growth will be limited

BY TIM RICHARD STAFF WRITER

It will become harder to raise future employment in a Michigan economy that is already short of workers, sever-

al experts agree.
There will be fewer new workers, and the hard-core welfare cases will be more difficult to bring into the work-

force.
"The demographic reality is that bake boomers have fewer kids. There

will be no growth in the labor force," said Lou Glazer, executive director of Michigan Future, an Ann Arbor-based think tank.

Growth of the labor force had been 2

Growth of the labor force had been 2 percent a year in the 1970s; now it's one percent, he said, and in the near future it will be zero.

"Today there are 20 percent fewer 16.24-year-olds than in 1880. That has a lot to do with why employers cantet find workers. Employers who expect people will show up at the door – it's not going to work," Glazer said during a Sept. 2 panel in Oakland County.

John Almstadt, who heads the county's employment and training division, agreed. He cited a University of Michigan forecast that "economic development can only be arrested if enough skilled workers aren't available."

Bias alive

And it's going to be tougher to pull workers from the shrinking welfare rolls, several agreed. Jennifer Phillips, a project manager for the C.S. Mott Foundation in Fint, said racial minorities are still discrimi-nated against in retail hiring.

Added Glazer: Welfare reform is working among whites, but "Welfare is increasingly concentrated among blacks and inner cities." He cited a Detroit high school where 80 percent of idds live in a household where no adult works. Thus, no one at home can show them good work habits.

"That's an inner-city issue. This thing's going to go on for a substantial period of time," Glazer warned.

"Almstadt of Onkland County was more optimistic. He cited an Oakland

LTU Boardnames two trustees

Douglas D. DelGrosso, president of Lear Corporation's GM Division, and Michael J. Evans, director of sport utility programs for Ford's Light Truck Vehicle Center, have been named to the board of trustees of Lawrence Technological University. Lloyd E. Reuss, chairman of the board, announced the appointments. "We welcome the counsel and involvement of these two talented executives on our board," said Reuss. "Their strong business leadership in industries which attract so many Lawrence Tech graduates, and their special perspectives as alumni of the university, prepare them to offer particularly helpful insights to the group."

group.
Trustees at the independent university set policy, adopt plans, approve budgets, and make major personnel appointments.
DelGrosso has held his present

post at Loar since May, 1997. He received the Automotive Hall of Fame's 1995 Young Leadership and Excellence Award, and in 1997 was a recipient of Crain's Detroit Business "40 Under 40" award which recognizes the region's most successful young business people.

DelGrosso holds a B.S.M.E. degree from Lawrence Tech and an MBA from Michigan State University. He resides in Troy.

Evans was appointed to his current post in March, 1996. He current post in March, 1996. He current post in March, 1996. He calso has extensive engineering and executive experience in powertrain develop-

ent and led Ford's effort to redefine

ment and led Ford's effort to redefine its product system. Evans, earned his B.S.M.E. from Lawrenco Tech and also holds a master's, in engineering management from the University of Detroit Mercy. He resides in Bloomfield Twp.
Lawrence Technological University, founded in 1932, offers over 40 undergraduate and graduate programs through Colleges of Architecture and Design, Arts and Sciences, Engineering, and Management.

It has a 110-acre full service campus in Southfield and a recently opened branch campus in Clarkston.

Southfield's Lear buys Delphi seat business

Lear Corporation has completed the acquisition of Delphi Automotive Systems' scating (Delphi Scating) business for approximately \$250 million.

"The acquisition of Delphi Scating strengthens our position in the \$48 billion global automotive interiors industry," said Kenneth L. Way, Lear Corporation's Chairman and Chief Executive

Officer.
Delphi Scating has 6,200 employees operating from 16 locations in 10 countries, and provides approximately 19% of General Motors' seat systems. Sales in 1997 were approximately \$1.4 bil-

ACQUISITION

lion.

"This is a very important acquisition for Lear as it strengthens our existing relationship with General Motors, expands our product lines, technical capabilities and market share, said Way. "Equally important, we can now offer Delphi Scating's product lineup to other manufacturers who may have been reductant to do business with a General Motors subsidiary in the past."

A Fortune 500 Company, Lear Corp. is one of the world's largest automotive suppliers, with 1997 sales of \$7.3 billion.

Inc.
The company's world-class products are designed, engineered and manufactured by more than 60,000 employees in over 200 facilities located in 28 coun-

tries.

Lear's 15-year compounded annual growth rate for sales and operating income is over 30 percent. Information about Lear and its products is available on the Internet at http://www.lear.com.

FANUC to be featured on the History Channel

FANUC Robotics North America, Inc., headquartered in Rochester Hills, Michigan, will be featured in a two-hour special airing on cable TV's The History Channel, premiering Saturday, Sept. 5, at 8 p.m. (EDT).

Produced by Digital Ranch, Inc., "Robotis" is a documentary that traces the evolution of the field of robotics.

Archival footage, interviews and computer-animated graphics will be used to reveal the fact, fiction and fantasy of these most fascinating machines.

FANUC Robotics' North American hondquarters in Rochester.

FANUC Robotics' North American hoadquarters in Rochestor Hills was used as the filming site for interviews with Eric Mittelstadt, chairman and chief executive officer of the company, as well as Donald Vincent, president of the Robotics Industry Association, headquartered in Ann Arbor, Michigan.

Mid-career job seekers can find help at ABLE

Operation ABLE of Michigan will help adult learners and mid-career job seekers acquire the skills that are needed in today's world of work and fine-tune their career development plans with its series of fall classes.

If you need help using the Internet as a job search and career transition tool, Operation ABLE is offering a hands-on course that introduces the basic terminolegy and start-up procedures for the Internet.

Students examine web sites that can be helpful for finding job leads,
