REVIEW OF PROGRESS THAT IS BEING
MADE ALONG ALL LINES OF ENDEAVOR

SELF-RELIANCE WINS

First of All Qualities That May
Be Relied on to Carry a
Man to the Top.

OBSTACLES MUST NOT DAUNT

When Things Go Wrong Is Just When
Strength Is Required to Put
Them Back Into Their Right
Groove—Solving One's
Own Problems.

In advertising for a man for a re-
sponsible position a firm states
among other useful qualifications,
that he must be able to "confront antagon-
ism."

What the firm really wanted was a
young man with backbone and the
stamina necessary to carry him through
obstacles. This kind of man would
soon be found, but the trouble is
that most men of courage in the face
of smoothly going affairs go all to
pieces when confronted with friction.
In the first instance they are strong,
reliable, and clear headed, but under
the latter circumstances are of no
earthly account.

A man of this character is perfectly
miserable when there is trouble any-
where, but as soon as harmony is
restored is a glutton of business acumen
and able to cope with any intricate
business proposition that may come
up.

Now, when trouble comes, the real-
ly strong man, the man who is com-
pounded of the gritty stuff of which
business is made, will brace
up, takes the bit between his teeth,
and rises to the occasion in proportion
to the difficulties to be overcome.

A young man who occupies a high
position in a large firm recently
was followed in this regard. Said he:
"I never allow myself to get to the
heads of the house with trouble unless
it is one that seriously affects the
firm's revenues."

"I consider that I am paid for solv-
ing the business problems that pre-
sent themselves and that I must fight
out alone whenever possible. Other-
wise I should not be worth the
money I am getting paid."

Continuing, he explained: "Acquir-
ing the habit was next to impossible,
and for a time I felt that it could not
be done, but after the first struggle
over the next one was easier, and
they have been growing less wor-
risome with each encounter. I do not
mean to say that they are easy, but
simply that one with determination

As to the Home Work

SAVING OF LABOR, WHEN IT IS
POSSIBLE, IS ESSENTIAL.

Every "Short Cut" Perfected Means a
Lessening of Wear and Tear on
Ever Busy Housewife.

Labor saving in the kitchen, as
well as labor saving elsewhere, is the
result of working with mind as well
as hands.

But as all lines are not built along
the same lines, so each housewife
must plan her own methods of saving
work. What is a "short cut" for you
may be the longest way round for me.

First, make up your mind as to the
relative necessity of various tasks.
Some things are essential, others more
or less desirable. The old saying:
"What is worth doing at all, is worth
doing well," has caught on.

Because napkins should be well
dampened and ironed until they are
dry is reason why the towels should
not be folded dry, and just smoothed
over with a hot iron.

The old phrase of a housewife that
her kitchen floor was too clean was
said out of her mouth more strongly
for her possessors than her mind, for
floors, after all, are made to be walk-
ed upon.

So decide which things are essential
to health. These must be done.
Certain things are conducive to com-
fort. Do all of these if possible.

Certain other things we do for look-
ing. This is the place to save labor by
doing "for looker" only the things we
have ample time and strength for.

Certain conveniences and arrange-
ments in the kitchen will save steps
and time, hence save strength. Try
to keep things as near as possible to
the place where you expect to use
them. Have a table in the kitchen
to sit or work at a chair of ironing
board, but be sure to have a few chairs
for your feet, to your lap, such as
preparing fruit or vegetables for
cooking.

The greatest convenience in the
kitchen is water. If it is impossible
to have running water, have a sink
with a drain and pump from the cistern.
Keep your eyes open for all the new
things, like the wireless cookers and

may often overcome the seemingly im-
possible.

This is the kind of employee that is
wanted everywhere, the man who can
solve his own problems and fight his
own battles without running to his
superior with every little annoyance
that confronts him. It is this sort of
man or boy who will eventually school
himself for a business of his own,
where he may safely invest the money
put by from the spendid salary that
such an individual is able, to com-
mand.

PROFIT SHARING IN ENGLAND

What the Head of an Industry Hopes
to See Accomplished Through
Co-operation.

At the annual meeting of the May-
pole Dairy Company, Limited, of En-
gland, held in London about two weeks
ago, W. G. Watson, chairman of the
board, had this to say of profit shar-
ing with employees in his address to
his shareholders:

"With the present tendency toward
large manufacturing and trading
companies it becomes more and more
necessary to give the workers a direct
interest in the business of their em-
ployers. Although I am in favor of
going very far in giving this interest,
my experience makes me believe that

the future of a business must depend
in a great measure upon the strength
and ability of the men who are ap-
pointed or elected to control it. If
the wrong men are appointed, the de-
cline of that business is inevitable
sooner or later. Contented labor is
very important, but it is not quite so
essential as an independent, efficient
and experienced control. This is prob-
ably only one of many reasons which
make socialism impracticable. The
labor unrest during the past year
shows that present conditions are un-
satisfactory.

The old personal bond between em-
ployers and employees is almost extinct
in many staple trades, and it is very
necessary to provide a satisfactory
substitute. Profits and employees must
try to bind the classes together
more closely, so that they may co-
operate and get to understand their
respective troubles, difficulties and
wishes. I hope the time will come
when all employees will divide among
their workpeople (in addition to their
wages) a certain share of all profits
made (after charging interest on cap-
ital), and when workpeople will agree
to take this agreed share of the profits
in lieu of an increase in their wages.
A portion of this share of profits could
with advantage be invested in shares
of the employing company. The em-
ployee could then elect a trusted rep-
resentative to the board, who would
see the difficulties of the employers,
and I hope thereby form the necessary
bond of sympathy between the work-
people and the employers."

Idea Brings Fortune

EXERCISE OF BRAIN PUT ONE
MAN ON ROAD TO WEALTH.

Found Means to Utilize What Previ-
ously Had Been Thrown Away,
and There's the Whole Story.

The saving of waste has become
one of the big problems of the busi-
ness life of today. And that is why a
Chicago man is making a good living
—simply because he had an original
idea in this direction, and has been
putting it to use.

Ordinarily, the material out of
which he makes his money—and he is
getting a good many thousand dollars
a year out of it—would be called junk.
Before his idea came it was
nothing but junk; worse than that,
it was waste. But after the first strug-
gle over the next one was easier, and
they have been growing less wor-
risome with each encounter. I do not
mean to say that they are easy, but
simply that one with determination

At every exhibition there are many
things which make the bits of paint,
canvases, decorations, and the like,
counted as waste.

electric frons. Get and use what you
can of these, but remember that the
greater the saving, the more is being
lost. "Make your head save your
feet" is the way our sensible for-
bears put it.

Value of Responsibility.
Greater than the value of contact
with facts is the value of responsi-
bility. In a man's life, it is the arrival
of some responsibility that arouses
his powers and makes durable the
qualities he manifests. The effect of
responsibility is instantaneous. It is
like a magnet in its power to charge
the individual with the faculties need-
ed for the matter in hand; a light is
kindled, a sense of responsibility is
formation. Even after a systematic
education these fragments seem to lie
in the mind in a chance order until
this light appears and shows them
ready for use, then abilities develop
which never would develop, even with
practice, without responsibility.—At-
lantic Monthly.

Even an idea hesitates to strike a
man when he is down.

How to Get to the Top.
Be prompt and punctual.
Do not be satisfied to do things;
try to discern why they are done.
Be courteous; it promotes the
interest of the employer—and he
recognizes that fact.

Study the duties of the position
above you. An emergency may
come; you will be ready.
Cultivate a sense of company
spirit. Remember that the com-
pany's interest is your own in-
terest.

Team work achieves splendid
results on the football field; try
it in business.
The efficiency of your chief
executive depends on the co-operation
and support he receives.
Tighten his burdens to attract
his attention, his friendship and
respect—which means promotion.

Remember that when you are
working for your employer you
are working for your own self and
your own future.

Remember that when you are
working for your employer you
are working for your own self and
your own future.

Remember that when you are
working for your employer you
are working for your own self and
your own future.

Remember that when you are
working for your employer you
are working for your own self and
your own future.

REPUBLICAN STATE CONVENTION

GATHERING AT BAY CITY ELECTS
TWO SETS OF DELEGATES
TO CHICAGO.

ROOSEVELT DELEGATES ELECT
DELEGATES AND LEAVE HALL.

State Chairman Knox Refused to Call
Convention to Order and the Tatt-
lers Delegates Proceed With-
out Him.

The Republican state convention, for
selection of delegates to the national
convention held at Bay City on the
11th, was one of most extraordinary
features in which the state militia and
the city's police force were prominent
figures, and the result is a delegation
composed of Tatt supporters and one
of Roosevelt delegates. This will give
the national convention a very bitter
contest to settle as to which dele-
gation shall be seated. The two fac-
tions fought for control of the Bay
City convention with a fierceness
rarely, if ever before, equalled in a
Michigan convention. There were
some very unusual methods employed,
and finally a split, two conventions,
two sets of delegates and, as a result,
not favorable to a harmonious settle-
ment even in the national conven-
tion, where final decision as to which
delegation is the legally chosen one will
be made.

Both sides adopted resolutions com-
mendatory of candidates for the favor-
able and both maintained their organi-
zation the legal one. It was a fight to
finish and both sides claim to have
won.

Outrages in Mexico Must Stop at Once
The state department has made
itself plain in its attitude toward the
government against Orozco, the Mexi-
can rebel leader. President Madero
has been given to understand that the
government may not longer tolerate
the brutal treatment of innocent Amer-
icans, the killing of American citi-
zens, the ruffian of American media
and other insults to this government
on the part of Orozco and his follow-
ers.

In presenting to Madero the case of
Albert Fountain, an enlisted soldier
who was captured and assassinated,
Heiberlin, American minister in Mex-
ico, who was taken prisoner, and a
number of other cases, the state de-
partment declared that the recognized
government must be held responsible
for these outrages. Madero has been
asked to try Orozco on the charge of
murder in the Fountain case and if
Orozco is ever found in the United
States he will be arrested on that
charge and returned to Mexico under
a demand for trial.

Flood Sweeps Tallulah, La.
As far as the eye can reach north,
east and west from the highest point
in Tallulah, La., nothing but water
can be seen. The Mississippi river's
flood tide, escaped from a break in
the levee near Abbeville, swept through
towns with the speed of a mill race.
Many buildings are afloat. Scores of
people, driven even from the roofs of
their dwellings in Tallulah, now are
homeless.

A mile and a half north of Tallulah
along the iron mountain railroad the
water is up to the chimneys on the
telegraph poles. It is believed that
further out the poles are submerged.

M. U. T. Lets Out All Old Officials.
Following an inspection of the Michi-
gan United Traction Co. system, B.
C. Cobb, president of the corporation,
announced the acceptance of a number
of resignations of prominent officials.
Practically all officials of the old Michi-
gan United Traction Co. were affected.
Recently the M. U. T. was taken over by
eastern capital, a number of changes
in office taking place at that time.

Funston May Succeed Gen. Grant.
Brig-Gen. Frederick Funston, the
best-known hero of the Philippine war,
might have a diet with success had they
not been so long drawn out.

Also, an eccentricity of writing, el-
ther as to actual orthography or man-
ner of placing the words, should be
avoided for the same reason.

If a woman's hand is not very clear
to read it is the part of wisdom to
have typewritten notes soliciting con-
tributions.

Should this be used the signature
should be put in by hand, but the
church or society for which the in-
dividual writes should be typewritten,
that it shall be so clear as to prevent
any error on the part of the person
reading.

Once it is understood that the writ-
er is a responsible person, her name
is unimportant as compared to the
society she is representing.

The writer's home address should
be given, and when she is a married
woman the name of her husband
should be put beneath hers, that the
recipient of the letters may have no
difficulty in looking her up should he
choose.

In the original note the name of the
society and church should be written
in full, and if the writer is not an
official the word "member" should be
substituted for the former.

An English Sign.
The following notice is posted in
the office of a Wolverhampton (Eng.)
firm:

"If you work for a man, in heaven's
name work for him. If he pays you
wages that supply you with bread and
butter, work for him, stand by him,
support him and stand by the insti-
tute he represents."

Nothing jolts an egotist like the re-
fusal of people to pay any attention to
him.
The average man's way of forgiving an
enemy is milder than his refusal
to do so.

A BLOOD MEDICINE WITHOUT ALCOHOL

Recently it has been definitely proved by experiments on animals that alcohol
lowers the germicidal power of the body and that alcohol paralyzes the white cor-
puscles of the blood and renders them unable to take up and destroy disease germs.
Disease germs cause the death of over one-half of the human race.

A blood medicine, made entirely without alcohol, which is a pure glyceric ex-
tract of roots, such as Bloodroot, Queen's root, Golden Seal root, Mandrake and
St. John's wort, has been extensively used by druggists for the past forty years as Dr.
Fierce's Golden Medical Discovery. The refreshing influence of this extract is like
Nature's influence—the blood is bathed in the tonic which gives life to the blood—
the vital force of the body burns brighter and their increased activity consumes the
tissue rubbish which has accumulated during the winter.

Dr. R. V. Pierce, the founder of the Invalids' Hotel and
Surgical Institute, and a physician of large experience
in the treatment of blood diseases, was the first to make up an Alleviator Extract of
roots, without a particle of alcohol or narcotics.

"It is with the greatest of pleasure, that I write to let you know of
the wonderful results I have obtained from the use of your medicine and
treatment at home," writes Mrs. Wm. H. Pierce, of Ladyville, N. C. "I feel
