To a

most important group of motor car buyers

Certain American people are getting on in the world. Many of them are just starting. But they're headed up the ladder. Their ideas of luxury are expanding. They want finer homes, finer furniture, finer automobiles.

These people form a most important group of automobile buyers. Their importance lies in the progress they are making. As they progress, their needs grow. Their ideas encompass new standards of living.

For three years, hundreds of thousands of these progressive Americans have been buying the Pontiac Six. Some of them have bought it as the first car they ever owned. But to most of them, Pontiac has represented the first big step up from the lowest priced field.

For this progressive group, Oakland has now created a brand new Pontiac Six. It represents an even greater advancement over everything else in its field today than the original Pontiac represented in 1926. It offers entirely new bodies by Fisher. It will take its buyers further than ever up the ladder of motor car quality in one step. Watch for the
