**65%**

of automobile injuries come from flying glass

NEW FORD TUDOR SEDAN

**\$525**

(F. O. B. Detroit, plus charge for freight and delivery. Bumpers and spare tire extra.)

**Triplex glass windshield will not shatter**

FIGURES compiled by the Massachusetts Mutual Liability Insurance Association show that 65 per cent of automobile injuries are caused by flying glass. This same survey estimates that the use of safety glass in all automobiles would reduce the number of injured in the United States by as many as 350,000 annually.

It is easy to see, therefore, the safety value of the Triplex shatter-proof glass windshields of all the new Ford cars.

The use of shatter-proof glass in the new Ford, without extra cost, is just another indication of the quality that has been built into every part.

When you see this great new car—when you know the thrill of driving it—you will realize that it gives you everything you will want or need in a modern automobile . . . beautiful low lines and choice of a number of colors . . . quick acceleration . . . 55 to 65 miles an hour . . . vibration-absorbing engine support . . . four Houdaille hydraulic two-way shock absorbers . . . Triplex shatter-proof glass windshield . . . Alemite chassis lubrication . . . fully enclosed, silent six-brake system . . . typical Ford economy, reliability and long life.

**Drinks Goat Milk.**  
**Weights 400 Pounds**  
New York.—"Pasquale Valch, who you are charged with keeping goats in the city limits, a violation of the sanitation code."  
Pasquale rose slowly from his seat in court. He weighed 400 pounds.  
The magistrate queried: "How in the world did you get so fat?"  
Pasquale replied placidly: "I drink goat milk."  
The court mused, then spoke: "Well, the ruling will do the goats no good, but it certainly will do you good. These goats must be killed."  
An interpreter explained that, Pasquale had already obeyed the health inspector and had driven the goats to the slaughter house.

**CARD OF THANKS**  
We wish to thank Rev. A. A. Schoen, also our neighbors and friends for the kindness and sympathy shown us during the illness and death of our little daughter, Emogene.  
Mr. and Mrs. E. D. Coffey

**Test Use of Crude Oil in Plane Motor**  
Berlin.—Tests that are claimed to have been entirely satisfactory have just been made in flights with an airplane fitted with a "Lumpkin" gasoline power engine that operates on crude oil.  
This is the first time an airplane has been flown in Germany with a crude oil motor, and due to the fact that crude oil is not readily kindled this makes for safety from fire in a crash. On account of this safety factor, coupled with the low cost of crude oil, it is claimed the invention of a crude oil motor will do much to popularize flying.  
The motor, which is the result of many years' research, was lengthily tested in a motor pit before being installed in an airplane. The makers have so far refused to reveal details of the test or specifications of the motor other than to say it generated 600 horse power.

**Uncle Sam's Private Fox Farm Yields 586 Pelts**  
Dutch Harbor, Alaska.—Uncle Sam has a fox ranch all his own. A total of 532 blue fox skins and 24 white ones were taken from animals trapped on the Pribilof Islands during the season of 1928-29, as compared with 901 the previous period.  
These island foxes live on the carcasses of fur seals killed for their pelts during late summer. The early winter faxes preserve the meat until the following June. Then for three months foxes subsist on sea food combed from the beaches.

Smart side cowl ventilators operated by foot control on the new Oakland All-American Six, in addition to heightening the beauty of the unusual body lines offer utility in that they send a refreshing sweep of air across the foot boards in warm weather driving.

Manchester authorities have handed mendicants who sing as they beg.
