Safeguard Food
to Safeguard Health!AUTOMATIC
ELECTRIC REFRIGERATION

Science has proved beyond doubt the necessity for keeping foods at a temperature below 50 degrees, and of constantly maintaining this coldness. Above this point, foods spoil rapidly. Unceasingly vigilant, an electric refrigerator keeps foods fresh and wholesome in a dry cold that is always uniform. In hottest summer weather, the temperature is unchanged. Day after day, year after year, an electric refrigerator provides unflinching automatic refrigeration. No attention is necessary other than an occasional defrosting.

INDIAN
\$250 Installed
The Indian has a capacity of seven cubic feet—twelve square feet of shelving for food storage—and supplies six square feet of ice (more than 10 pounds of ice).
