OAKLAND TO CONTINUE

WITH PRESENT LINES

No material mid-season change will be made in the 1929 models of the Oakland All-American Six and the Pontiac Big Six. It is announced by W. R. Tracy, vice-president in charge of sales for the Oakland Motor Car Company.

In previous years it had been the policy of the Oakland Motor Car Company to introduce a new line of Oakland Sixes in mid-summer and new Pontiac models at the beginning of the year. The factory recently received many inquiries regarding its plans. "No changes are needed," Mr. Tracy explained. "The sustained demand for these cars offers the best proof that they continue to lead their respective fields in appearance, engineering and performance."

"Model changes invariably are made to keep cars abreast of the popular demand. The present Oakland All-American Six was introduced in November last year. The new Pontiac Big Six followed last January. Many revolutionary advances placed them so far ahead of current practice that they are as new today as when they first entered the market. To change models now would mean to alter uses, which the public very evidently wants."

Proving

what thousands already know . . . that here is America's finest medium-priced automobile

The information in the accompanying chart was compiled by comparing the Oakland All-American with twenty other medium priced cars. It shows them higher than Oakland in price. It proves to everyone what thousands of Oakland owners already know—that today's Oakland All-American is America's finest medium-priced automobile.

Only a few comparisons are given here. There are scores more which we will be glad to show you. Come in to see them. And while you are here, drive today's Oakland All-American Six.

What these features mean to you

Large piston displacement is needed to develop high power at moderate engine speed. Moderate engine speed is an important factor in the life of a car.

PISTON DISPLACEMENT

Oakland's 238 cubic inch piston displacement is greater than 12 of the 20 cars in its price field. Of the 8 remaining cars, 7 are higher priced than Oakland.

FISHER BODY

Only Oakland and two other cars in the field offer bodies by Fisher. And one of the three is nearly \$100 higher in price than Oakland. Of the 18 cars which have less-known bodies, 11 are priced above the All-American Six.

WHEELBASE

Only one car as low priced as Oakland has a wheelbase as long as Oakland's, which is 117 inches. That car requires a turning circle to the left of 12 feet as compared with Oakland's 36 feet. Six higher priced cars have shorter wheelbases.

Reasonably long wheelbase gives greater riding ease and road balance. Also permits use of longer, smarter, roomier bodies. At the same time, a wheelbase of 117 inches is essential to handling ease.

Prices, \$1145 to \$1275, including tax, license, and delivery charges, sporting covers and factory shock absorbers including first price. Humpback and rear fender guards extra. General Motors Time Payment Plan available at minimum rate.

Consider the delivered price as well as the list price when comparing automobile values. . . . Oakland's delivered price includes only reasonable charges for handling and financing when the G. M. A. C. Time Payment Plan is used.
