

**WALLED LAKE BUSINESS MEN ACT TO PUT CHECK ON FUND SOLICITORS**

The Exchange Club of Walled Lake took a step on Tuesday to help prevent solicitation of funds by individuals and organizations which are representing fictitious agencies.

Glen Buffmyer and H. G. Roach were appointed by President Ray Riley to act on all applications and if the cause is worthy and legitimate to give a card of approval. The committee will fully investigate every application from persons who desire to solicit in the community or conduct a house to house canvass and if they do not consider their credentials satisfactory will not issue a card. This will not prevent soliciting or canvassing, but it will mean that the person who cannot present a card of approval either cannot or does not want to present his credentials for investigation.

Cards will be printed for business places to display conspicuously. The approval will not be of the cause or of the goods but merely of the integrity of the individual or organization.

The Exchange Club elected Hiram Sims president at the meeting of the Club on Tuesday. F. S. Nook was elected first vice president, J. R. Brown second vice president and M. G. Post third vice president. C. A. Chafy was elected treasurer and Cameron E. Rose secretary.

Ray Riley, retiring president, became a member of the board of control for one year and Ira S. Carnes and Glen Buffmyer were elected to serve with him. E. L. McQuern, Dr. E. J. Linsaday and Charles E. Hutton are the other three members of the board of control.

Next week the Club will go to Pontiac for an evening of bowling.

**When you purchased your home**

... you wanted it for comfort and as an investment—not for speculation and risk. Then why speculate with it now, inadequate insurance is speculation with fire and the elements. Do not leave your investment exposed to danger of loss.

**CHURCHES**

**Evangelical Church**  
Rev. A. A. Schoen, Pastor  
Sunday School, 10-11:15.  
German service, 10.  
Installation of officers.  
English worship, 11:15.  
Subject: "Divine Discipline."  
This is the second of the "Moses" sermons.  
Choir, Thursday night.

**Baptist Church**  
Rev. E. W. Palmer, Pastor  
10:30—Morning worship. "In the Net."  
11:45—Bible School with class.  
6:30—Young Peoples Hour.  
7:30—Evangelistic service.  
Sermon theme, "Hell, and How Shall We Escape?"

**Our Lady of Sorrows Church**  
Rev. James A. Callahan, Pastor  
Sunday masses at 7 a. m., 8:30 a. m. and 11 a. m.  
Daily mass at 8:00.

**Methodist Church**  
Dr. H. Addis Leeson, Pastor  
Splendid services are being arranged for the coming Sunday. The congregation last Sunday—the first of the New Year—was much larger and the new resolution to begin the service sharply on time worked out most satisfactorily. Miss M. Marie Walling and Arthur Applin sang a beautiful duet of their own composition. This was so well received that requests have been made to have it repeated on next Sunday morning.

The pastor's sermon will be on the subject "One Thousand Percent," a special message for those who begin the year with a desire and purpose to be more loyal to their church obligations and privileges this year.

In the evening the large chorus-choir from the Bethany Church in Detroit will present an evening of music. The hour has been set for 8:30 to accommodate members of this choir who must go to their work on night duty. Note the hour is 8:30. A fine musical treat in exchange for the visit of the Farmington Choir last Sunday evening.

**Clarenceville M. E. Church**  
Rev. Robert Richards, Pastor  
10:30—Morning worship.  
11:30—Sunday School.  
7:30—Evening service.

**St. Paul's Evangelical Lutheran Church, Clarenceville**  
(At Switzer Road)  
Rev. Paul Graupner, Pastor

Sunday School, 9:30.  
English service, 10:30.  
Voters' Meeting, 2:00.  
Ladies' Aid at parsonage, 2:00.  
Bible Class and Annual Y. P. S. meeting on Thursday, 8:15.

**How the Useful Plants Came to Mankind**  
By T. E. STEWARD  
WNU Service

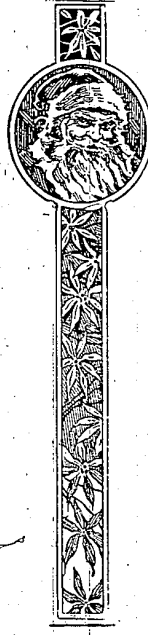

**The Turnip**  
WITH the turnip we come again to a plant native to the temperate regions, growing wild in one of its several forms in Sweden, England, Germany, Holland, Finland, Denmark and, probably, in Siberia. Cabbages, cultivated for their leaves; cauliflower, for its flower stalk, and rape, which is grown for the oil that can be extracted from its seeds, are all species of the same genus as the turnip. When the root or lower part of the stem is fleshy, as is true of turnips, the seed is not abundant nor worth the trouble of pressing for oil. On the other hand, the slender-rooted varieties produce large quantities of seed. Thus the shape of the root determines the economic use of the plant.

Ancient European languages all have names for the turnip, while all of the names applied to it in India, China, and Japan have their modern ring and only add to the evidence that in Asia the plant has been introduced. Old works on botany in China and India contain no mention or picture of the turnip in cultivation of wild.

De Candolle gives four conclusions regarding the Brassica or turnip species, as follows: 1. The brassicas with fleshy roots were originally natives of temperate Europe; 2. their cultivation was diffused in Europe before, but in Asia, after, the Aryan invasion of Europe; 3. the primitive slender-rooted form of brassica plants, called brassica campestris, or of the field, had from the beginning a more extended range, from the Scandinavian peninsula towards Siberia and perhaps, introduced into China and Japan, through Siberia, at a epoch which appears not to be much earlier than the Graeco-Roman civilization. In the last place, he says, turnips spread into southwestern Asia at a period later than that of the Hebrew civilization, as this vegetable seems to have been known among the Hebrews.

The turnip has a name of its own in practically all of the old European tongues.

The turnip is cultivated so easily and spreads so readily that it may be found in a semi-wild state almost anywhere in Europe today in spots where it has escaped from cultivation. There is abundant evidence, however, that it also grows in an actually wild state in the many regions already enumerated and is a true European. (© 1924, Western Newspaper Union.)

**Add \$50 to Your 1930 Christmas Fund**

NO matter how generously you've planned for Christmas expenses, experience has taught you that it's well to provide a wide margin for unexpected outlay.

Just figure on an additional \$50 and save it by putting

an extra dollar each week in our 1930

**Christmas Saving Club**

You will hardly miss it and you'll have that extra \$50 margin which you are sure to wish for next Christmas.

**This Meter MEASURES LIGHT**

YOUR electric meter accurately measures the electric current consumed in your store. But have you ever accurately measured your illumination? It is equally important unless your lighting installation is adequate, the current you pay for is not producing maximum effect.

The foot-candle meter measures intensity of light, scientifically and without guesswork. It tells you definitely whether your store lighting is good or bad. You may have your lighting inspected without charge by Detroit Edison illuminating engineers, who will study your store and make whatever recommendations are necessary to improve your lighting. This is part of our service.
