## Be Careful

Be safe when you drive on the highways this summer.

The number of people killed in automobile accidents so far in 1930 exceed the number killed last year.

The great cause of serious accidents is speed. Most people drive too fast. We do not refer to the speed on the open road but the speed on highways on which danger lurks. A speed of 50 miles an hour may be safe in one place and the speed of 20 miles a danger in another.

Remember this—most automobile accidents are preventable. There is someone at fault in nearly every case where injury or death exists. That fault may be very far from intentional but it exists.

Be careful when you drive.—Exchange.

A poor joke isn't improved by repetition.

Some of the best fun in life is a by-product of the day's work.

If you like people, you'll generally find they like you.
