

THE NEW FORD

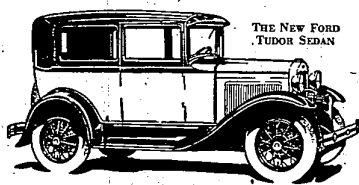

**Everything
you want or need
in a motor car**

THE more you see of the new Ford, the more you realize that it brings you everything you want or need in a motor car. . . . And at an unusually low price.

Its substantial beauty of line and color is apparent at a glance. Long, continuous service emphasizes the value of its simplicity of design and the high quality that has been built into every part.

The new Ford accelerates quickly and it will do 55 to 65 miles an hour. It is an easy-riding car because of its specially designed springs and four Houdaille double-acting hydraulic shock absorbers. It has fully enclosed four-wheel brakes and the added safety of a Triplex shatter-proof glass windshield. Operation and up-keep costs are low and it has the stamina and reliability that mean thousands of miles of uninterrupted service.

See the nearest dealer and have him give you a demonstration ride in the new Ford. Check up every point that goes to make a good automobile and you will know it is a value far above the price.

Auto Show To Open In Detroit Saturday

Anticipating one of the greatest successes in the history of this outstanding annual event because of the intense interest evidenced by the public in the radical changes effected by motor car manufacturers in their new models, the management of the 30th annual Detroit Automobile Show, opening next Saturday in Convention Hall and continuing through

January 24, has provided unusual features for the show crowds.

Aside from the most comprehensive display of the 1931 cars available at any of the major automobile exhibitions, due to the three and one-half acres of space in Convention Hall, and the richest setting ever conceived for the unveiling of the world's finest custom bodies in the salon that for several years has been held in the North Cass avenue annex, a complete panorama of the world's progress in transportation from the time of the ancient chariot, Indian drag, ox cart, stage coach and prairie schooner to the beginning of the automotive era has been made possible through the co-operation of Henry Ford.

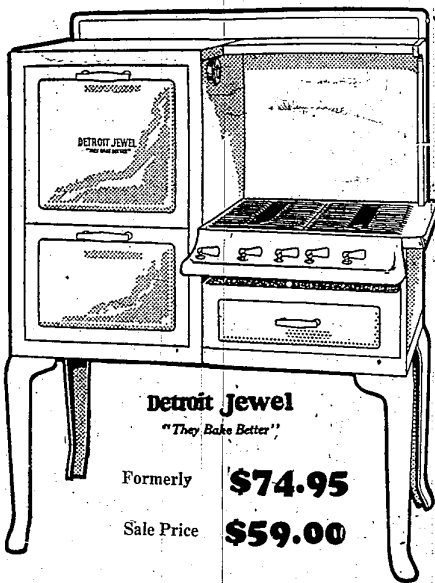

In the decorative treatment of Convention Hall, Manager H. Stuart will present the most striking background yet worked out during the more than a decade he has headed the enterprise. The French influence, in which many artistic scroll fixtures, thousands of soft lights, the silver vase motif, and colorful ceilings and walls will play a part, has dominated this year's exhibit. The always fascinating accessory and equipment department, again located in the North Woodward avenue annex, is being arranged to facilitate examination of the many new devices for the comfort and convenience of the motorist.
