Mrs. Charles French and daughter, Vivian, spent Monday evening at the home of Mrs. E. Ransier.

PRIME MINISTER PLACED DAILY CALL TO SYDNEY

Prime Minister James Henry Scullin of Australia was in the midst of climactic times in Australia. His Labor Party was under heavy political fire in connection with the financial problems with which the Commonwealth was faced. At the same time it was imperative that he represent Australia at the British Imperial Conference at London. Prime Minister Scullin attended the conference, and led his party to the adoption of a satisfactory program at home, 11,000 miles away, at the same time. Doing it, he used the radio telephone service at least once a day during his stay in London.

Try an Enterprise Liner.

Everybody in Washington insists that they are for Farm relief, but find two who agree upon how to get it.

If the boss' desk is clean it indicates that an assistant is doing the work.

With our unemployment problem it would appear that we should be called upon to solve the European problem.

A committee is a perfect device for postponing action and dividing responsibility.

FORD SMOOTHNESS

The new Ford has more than twenty ball and roller bearings

EVIDENCE of the high quality built into the new Ford is the extensive use of ball and roller bearings. There are more than twenty in all—an unusually large number. Each bearing is adequate in size and carefully selected for the work it has to do.

At some points in the Ford chassis you will find ball bearings. At others, roller bearings are used regardless of their higher cost. The deciding factor is the performance of the car.

The extensive use of ball and roller bearings in the new Ford insures smoother operation, saves gasoline, increases speed and power, gives quicker pick-up, decreases noise, and gives greater reliability and longer life to vital moving parts.

Other outstanding features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, three-quarter floating rear axle, Rustless Steel, the extensive use of fine steel forgings, and unusual accuracy in manufacturing.

Electric Cooking

**SEALS IN the delicious natural
flavors of foods**

The reason so many modern women prefer an electric range is because it seals in the delicious natural flavors of meats and vegetables. Even the cheaper cuts of roasts cook to melting tenderness. Very little water is necessary, and the nourishing juices that are lost in the form of steam in an ordinary stove, are retained by electric cooking.

Baking, too, is simplified with an electric range. Pastry is flaky, and cakes are light and fine-grained. Automatic even heat control eliminates guesswork and assures consistent baking results, time after time. Once you have enjoyed electric cooking, you will never again agree to cook with flaming fuels.
