EASY MEASURES STOP LOSSES FROM GOITER

Michigan flockmasters can prevent the occurrence of goiter in next spring's lambs by feeding their breeding ewes one or two grains daily of either potassium iodide or sodium iodide, according to a statement by animal husbandry specialists at Michigan State College.

The chemical can be fed to the ewes by mixing it with grain or it can be dissolved and poured over the salt which is fed to the sheep. Another method of administering the medicine is to mix one ounce of it with 25 pounds of salt and 25 pounds of steamed bone meal.

Care must be taken in mixing the chemical with the salt and bone meal to get an even distribution of the iodide. It is best not to make up too large a quantity of the mixture at one time.

Rabbit fur is known by 75 trade names, neither of which is "rabbit."

CHURCHES

St. Paul's Evangelical Lutheran Church, Clarencville
(At Street Road)
Rev. Paul Grauber, Pastor

Palm Sunday, 9:30 Sunday School.

This will be followed by a pageant, "Ecce Homo."

Ladies' Aid meeting Wednesday afternoon.

Y. P. League, Wednesday evening.

Methodist Church
Rev. F. C. Johnson, Pastor

Next Sunday is Palm Sunday and marks the beginning of Holy Week. A week we hold sacred, in memory of our Saviour's last week as a man among men on earth.

At the morning 10:30 o'clock and evening 7:30 o'clock services, the sacraments of the Lord's Last Supper will be offered to all who desire them. This is a fine way to begin Holy Week and we invite you to avail yourself of this privilege. The morning meditation will be drawn from the theme "The Host Opportunity" and in the evening will be a unique cross service, the theme being, "The Significance of the Cross."

A spiritual retreat in the form of a preaching mission will be held every evening at 7:30, except Saturday. There will be no other activities in the church during Holy Week. We urge every one to postpone all social dates and give the entire week to Bible study, prayer and church.

The themes for the messages of the week are drawn from Christ's last teachings.

Monday: "Unanswered Prayer," Tuesday: "Falling Faith," Wednesday: "Satisfied," Thursday: "Forsaken" and Friday "Uncertainty."

A Good Friday service will be held from 12 to 3 o'clock in cooperation with the other Farmington churches. Everyone will be most cordially welcome to every service of the church.

Arabs believe that the stork has a human heart. Anyway, the famed bird is extremely generous to some families.

More Than Million in Twenty States Fed by Red Cross Volunteers

Hot School Lunches and Balanced Rations Given to Drought Victims—Seed Programs Instituted on Wide Scale

More than 1,000,000 persons in 862 drought-stricken counties of 20 States came under the care of the American Red Cross in what developed into the most extensive relief operations in half a century of ministering to stricken humanity.

Measures to lessen the severity of the blow inflicted by drought were taken as early as last September, when seed was distributed to more than 58,000 families for the planting of corn and other pastures, and to more than 27,000 families for the planting of kitchen gardens. The expenditure for this purpose amounted to \$226,800. Green vegetables were made available up to the first of January.

Early in February another Red Cross garden program got under way and 507,000 packages of seed were distributed in 15 states. Quarter-acre plots were planted to beans, beets, cabbage, carrots, collard, sweet corn, kale, lettuce, mustard, okra, onions, peas, spinach, squash, tomatoes and turnips. Once again were farm families given the opportunity to participate in their own salvation.

A comparatively mild winter contributed to the success of the Spring and Fall seed campaigns. Many habitual single-croppers were introduced to the advantages of kitchen gardens, balanced cropping and balanced diet. Numerous land-owners have expressed the opinion that this constitutes the one apparent blessing to come out of the drought catastrophe. The United States Department of Agriculture and the local county agricultural agents and home demonstration agents co-operated in making this part of the relief operations outstandingly successful.

Balanced Meals Served

Red Cross feeding was aimed at adequacy and scientific correctness, as well as simple economy. In large numbers of schools, where children were found to be languishing with little or nothing in their lunch boxes, hot meals were served at noon. A typical menu consisted of vegetable soup and bread one day; thick beef soup or stew with vegetables another day; cocoa or milk and cheese, peanut butter, or jam sandwiches, a third day.

In some places where lunches were not served in the schools, but were provided for in the regular food orders, each family having school children r.

colored extra staples for school lunches including peanut butter, raisins, prunes and tomatoes. Red Cross nutritionists instructed mothers in the preparation of lunches.

County health officers and private physicians commended the adequacy of rations procured on orders issued by Red Cross chapters, which were filled at local stores. Besides the usual staples, such as corn meal, flour, lard, meat, beans and potatoes, such items as canned salmon, cabbage, tomatoes, vegetables and milk were provided, each order being adapted to the special needs of the family for whom it was issued. Where pellagra threatened, eggs, yeast and other preventives were given.

Thousands of Volunteer Workers
Many thousands of volunteers, through their local Red Cross chapters, gave freely of their time, experience and efforts, as in other Red Cross disaster operations. They searched out needy cases in their communities, many persons being restrained from asking assistance because of pride. Chapter committees investigated circumstances, distributed food and clothing.

More than 500 carloads of foodstuffs were contributed. These were given free of charge by railroads. Farmers of more fortunate sections embraced the opportunity to help their pastoral cousins of the affected area. Shipments ranged from live poultry to fish, from grain to grapes. Carloads of flour, eggs, beans, vegetables, onions, rice, corn and mixed vegetables were included.

As the result of co-ordinated Red Cross chapter efficiency, not one authenticated case of starvation as a result of drought has been uncovered.

Large quantities of new and used clothing were distributed. In direct consequence many school children resumed their studies who had been kept at home for lack of sufficient protection from the elements. In some instances, rural schools that had been closed were enabled to reopen as a result of Red Cross relief work.

States involved were: Alabama, Arkansas, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, West Virginia.

Many of these States had been hard hit by a succession of floods, crop failures, low prices and economic depression, and drought constituted a climax to the cycle of distress.

"Wherever I went" wrote one observer, "I made a point of asking what would have happened if the Red Cross had not been able to respond. In widely scattered points, from leading citizens, came the answer that undoubtedly there would have been many deaths by starvation, with epidemics prevailing upon the undernourished."

NEW INSTITUTION MAY SERVE 37 COUNTIES

A population of 455,679 in an area of 22,761 square miles, comprising the 37 northernmost counties of the Lower Peninsula

and the four eastern most counties of the Upper Peninsula, is affected by the movement under way in the present session of the Legislature to build a State Tuberculosis Sanatorium in north central Michigan.

FORD SAFETY

Triplex shatter-proof glass windshield has saved many lives in collisions

EVERY new Ford is equipped with a Triplex shatter-proof windshield. This is made so that the glass will not fly or splinter under the hardest impact. It has saved many lives and prevented injuries in many automobile collisions.

This shatter-proof glass windshield is just one of many features that make the new Ford a value far above the price. Others are the silent, fully enclosed four-wheel brakes, sturdy steel body construction, four Hot-die double-acting hydraulic shock absorbers, more than twenty ball and roller bearings, extensive use of fine steel forgings, aluminum pistons, chrome silicon alloy valves, torque-tube drive, three-quarter floating rear axle, Rustless Steel, and unusual accuracy in manufacturing.

In addition, you save many dollars because of low first cost of the new Ford, low cost of operation and up-keep, and low yearly depreciation.

LOW PRICES OF FORD CARS

\$430 to \$630

F. O. D. Dealers, plus freight and delivery. Bumpers and spare tire extra at small cost. You can purchase a Ford on economical terms through the Authorized Ford Finance Plans of the Universal Credit Company.
