FUEL AND SUPPLY CO.

Soundly built to serve you long and well

The piston pin test—showing one of the many noteworthy advantages of Chevrolet quality

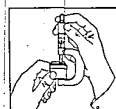

If you could see the new Chevrolet Six being built, you would understand why it performs so well, lasts so long and brings so much satisfaction and pleasure to its owners.

The quality of raw materials is held to standards unsurpassed anywhere in the automotive industry. In the manufacture of the engine alone there are hundreds of separate inspections. Pistons are matched in sets to within one-half ounce. Piston pins must be within 1/16 tenths of one one-thousandth of their specified size. Connecting rods are matched to within

one-quarter ounce and are individually fitted by hand. The special alloy-steel crankshaft is the subject of truly amazing care and precision in manufacture and cannot vary from perfection in balance more than 1/4 inch-ounce!

These few examples of Chevrolet standards indicate the care used in the manufacture of every part of the car.

Soundly built to serve you long and well! No compromise with quality in manufacture means no compromise with complete satisfaction in ownership.

Chevrolet precision instruments are regularly checked against master gauges which are accurate to one millionth of an inch

NEW CHEVROLET SIX

The Great American Value
