"Tempting, flaky biscuits bake perfectly in my ELECTROCHEF semi-sealed oven!"

CASH PRICE \$1.05

It's the moist flakiness of biscuits that make them so good to the taste, and one of the chief features of my Electrochef is its gentle, moist heat. I simply make the dough as moist as possible, and then set my Electrochef heat control at the proper temperature. The moist atmosphere of the semi-sealed Electrochef oven bakes the biscuits to a fine-textured flakiness. Mirror-like oven walls reflect the heat gently and uniformly to all parts of the oven. There is no severe drying out to burn some of the biscuits and underbake others. In my Electrochef oven, all are delicately browned, and all rise properly to a light, tempting flakiness.

"I don't know what I'd do without my Electrochef electric range. For fine baking results, it's the most reliable stove I've ever owned!"

A study of one thousand families in 1929 showed that 40% of the women in the country owned an Electrochef. The range showed a cooking cost of 1¢ less than a regular range.
