Cranbrook School Idea Outlined By Speaker

(Continued from page one) are assembled masters in each kind of work, brought from all over the country. This cultural opportunity may not be confined to the students of the school, the instructors are allowed half of their time, at liberty to teach and develop others as they desire. Many who are not regular pupils of the school may thus take advantage of the training which is available at nominal tuition fees, Mr. Oliver said.
The speaker traced the origin of "The Cranbrook School idea," which began with establishment of a small country day school for Mr. Booth's children and others. Then came Christ church, now renowned throughout the country because of its famous carillon which began with establishment of a small country day school for Mr. Booth's children and others. Then came Christ church, now renowned throughout the country because of its famous carillon which began with establishment of a small country day school for Mr. Booth's children and others.
Open Girls' School
Demand made it necessary, Mr. Oliver said, to follow establish ment of the boys' school with provisions for the teaching of girls and Kingswood School for Girls was founded.
Each of the many institutions is managed by its own board of directors, acting under a board of trustees. Mr. Booth has turned entire ownership and management over to these boards of trustees whose work is co-ordinated under the Cranbrook Foundation. The directors decide upon fees, management, etc., having complete control of their school.
Broaden Advantages
Mr. Oliver said in a conversation after his address that while the tuition fees at Cranbrook restrict pupils to children of the well-to-do, these in charge endeavor to make the advantages offered by the school available in as broad a scope as possible and in a democratic manner, by such provisions as those permitting the instructors in craftsmanship to teach outside pupils in the leisure time afforded them.
Mr. Oliver visited the club as the guest of Dr. Joseph Norton, and invited the club to visit Cranbrook in a body soon. The club voted to do so, and arrangements for such a trip will be made in the near future.

"It Always Has!"

It had rained for days and days in a particular locality. An old-timer was asked by a visitor, who had never seen so much rain before, "Is it ever going to stop?" The old-timer looked up at the sky and remarked, "It always has!"
So, too, with these trying times. They will pass, and better days will come, and those who had courage to keep steadfast and kept faith in their country and in their community will reap the reward of their strength and fortitude.
We know this will be proven true in the recovery from this depression, as in the others, because "It always has!"
