Unlike most railreads, the telephone companies follow the custom of the communities in which they communities in which they operate, with regard to the observance of daylight saving time. And after the time at the originating point governs the charges for long distance telephone calls, reduced evening and night rates become effective according to daylight saving time even if the call is made to a place where standard time is in effect.

Daylight saving time is the call of the call is made to the call of t

ing time even if the call is made to a place where standard time is in effect.

Daylight saving time is also observed in several foreign countries, and in fact there are only about six weeks in the year when all points to which the Bell System extends service are on standard time. In South America, for example, daylight saving time comes during winter in this country, which, is summer in the southern hemisphere.
