SKIM MILK AS FEED

East Lansing.—The use of skim milk for feeding calves, hogs, chickens, or dairy cows may enable Michigan farmers to realize more profits from their dairy

herds, according to the dairy department at Michigan State College. One hundred pounds of skim milk is equal in feeding value to 25 pounds of corn and 11 pounds

of tankage as feed for hogs. In addition to the nutrient value of the milk, this feed has properties which promote fine, thrifty gains on pigs. Experimental work has shown that the addition of milk to

a deficient ration of corn and water will enable a pig to change from a stunted animal to a fine one.

I suppose that I may claim to be the first Ford Dealer. I not only made cars, but sold them and frequently delivered them myself. The "drive away" is not new; often I have driven cars from Detroit to towns in Ohio or Indiana or Michigan to make delivery. There were no good roads in those days, and the people where I drove had never seen a motor car before. My first really enthusiastic customers were Country Doctors. They were the first to realize the value of dependable transportation to a widely scattered practice. Even today I occasionally hear from some of those first Ford users. We had to teach local mechanics how to care for the cars. That is how Ford Service began, which is now found everywhere in the world. We believed from the beginning that a sale does not complete our transaction with our customer — it creates upon us an obligation to see that our customer's car gives him service. Ford Dealers know their duty to the public in this respect. I can say of Ford Dealers generally that they have been and are men of character and standing in their communities. Most of them have been with us many years, which indicates that we agree on basic business principles. The company provides that the methods used to sell the Ford car are consistent with the self-respect of the Dealers who handle it. The present Ford V-8 is the peak of our 30 years experience. We have never made a better car. Its eight-cylinder engine is powerful and smooth running. The car is admittedly very good looking and has comfortable riding qualities. It is economical in operation because of advanced engine design and low car weight. It is the fastest, roomiest and most powerful car we have ever built.

Honeymoon Upset
By Doting Mother

"Not many bridegrooms would bring along a checkerboard on their honeymoon."

ZaSu Pitts was right. Few indeed, would be so thoughtless. But it came in mightily handy when the wistful ZaSu and Slim Summerville, her bridegroom of a few hours, were forced to sit up all night on the train which was bearing them to Niagara Falls on their honeymoon, and they felt the necessity of doing something to keep their minds occupied.
