Farmington Woman's Club Will Meet February 15

On Wednesday, January 31st, the Farmington Woman's Club met at the home of Mrs. Joseph W. Norton. After a short business session, came an interesting program on "Michigan's Prominent Women" and "Michigan Artists."

These subjects were ably handled by Miss Esther Boynton and Miss Helen Hard, and reminded us that Michigan Women blazed the trail for various reforms that are generally accepted to-day; such as: Sanitary commission, co-education and parliamentary practices.

Plans were also perfected for the next meeting to be held in the dining room of the Methodist church on Thursday, February 15 where a dinner will be served at 1 o'clock for members and their guests. There will be a quiz display and discussion on a musical program. Mrs. B. W. Heeneey, Mrs. Louis F. Schroeder and Mrs. Joseph W. Norton are on a special committee for arrangement and anyone having quilts or display may call anyone of the committee. Mrs. Spencer J. Heeneey also has charge of the ticket sale, where members may make reservations for themselves and guests by Saturday, February 10th.

An interesting part of this meeting is that guests will be the elder women of the community.

CAR GOING AT 40 MILES AN HOUR IS LIKE FIRING OF FIELD PIECE

An automobile is productive of an energy, which if not controlled continues to have immense potential destructive possibilities. These destructive possibilities in the case of a car weighing 3,000 pounds and traveling 40 miles an hour, or 59 feet a second, are as great as those which are released by the actual firing of a field gun of a certain size as illustrated.

People have become accustomed to the use of an automobile. They regard it as something which most anyone can manage with safety. People are not familiar with the handling of a field gun. They regard it as something distinct relation between the rate of speed by which a person or object is struck and the severity of the resulting injuries and damage. Data contained in a study of last year's country-wide automobile accident experience made by The Tractors Insurance Company show that if a 3,000-pound car should be stopped within three inches, a realize its dangerous possibilities, and that the more powerful its mechanism the greater are its capabilities of destruction? Countless persons, or their dependents, and friends, learn from bitter experience had a moving automobile in the hands of many is simply a modern adaptation of the war chariot of old, leaving in its wake the dead and the injured.

No one can deny that there is a distinct relation between the rate of speed by which a person or object is struck and the severity of the resulting injuries and damage. Data contained in a study of last year's country-wide automobile accident experience made by The Tractors Insurance Company show that if a 3,000-pound car should be stopped within three inches, a realize its dangerous possibilities, and that the more powerful its mechanism the greater are its capabilities of destruction?
