COW ON TEST SHOWS NEED OF SUMMER GRAIN

For several pears dairy athorities have expressed the opinion that cow owners could not rely on pasture alone for milk and make money in the long run by doing it. For a long time this was, largely theory, but real efficience has been obtained to settle the question. For two whole years several owners for the pears of the pears o

Research Farm, Redford, Michigan, where the comparative, value of grain and pasture was tested out. The record of own No. 76 is typical of the results obtained. She is greater than the contraction of the results obtained. She is good producer and as good a cow as could have been chosen for such an experiment. Throughout one whole lactation this cow was kept on a grain ration, with absolutely no pasture day, and kept on the contraction of the cont

Most the pasture season.

No dairyman could ask for more convincing proof that reliance on grass alone is costly, and that a regular grain ration, with pasture throughout the summer, pays real dividends in milk production.

"Cross Country Cruise"

At Northville House
Amreica's great ocean-to-ocean expanse with its ribbon of roadways as a locale forms the theme for Universal's "Cross Country Cruise" starring Lew Ayres with June Knight, Alice White and Alan Dinehart, at the Penniman-Allen Theatre, Northville Saturiaday, June 23.

It is a story of mile-aminute action abroad a transcontinental bus plying between New York and San Francisco.

Produced in a unique manner, the story deals, principally, with the lives of five travellers. Norman, a rich play-boy, Sue, a beautiful passenger; Steve, his suspicus wife Nits, and May, a chorine. How Sue eventually, "gets the man," and, how Norman clears Sue in the tragic death of Nits and exceuse his love from certain doom at the hands of the despicable Steve is logically revealed.

UMMER weather brings a demand S for cooling and refreshing baths, for invigorating showers, for countless uses throughout the day. Have you ever known the unequalled comfort of an abundant supply of hot water, definite in quantity, day and night, ready when you wanted it?

Here is something new: Decide how many gallons of hot water you want available for your family every 24 hours. With this new service you buy

a measured quantity of hot water each day, available day and night, and you need only pay for that amount.

The low rate for this service is possible through the use of a specially designed heater which stores the hot water during the night hours.

The new low rate now offered for electric water heating is a flat annual rate for year round service, which permits you to enjoy electric hot water for as little as 8c a day (40 gallons). Sixty gallons of hot water cost 10c a day, and eighty gallons 12c a day. Under this new arrangement, you may also obtain a seasonal rate for electric hot water, should you desire to use the heater only during the summer months. This rate is slightly higher - about 11c

a day for 40 gallons, 13c a day for 60 gallons, and 16c a day for 80 gallons. You may buy or rent an electric water heater, whichever you choose. Rental rates for heaters are low, and if you profer to buy the heater, convenient monthly terms may be arranged.
