**PHILLIPS RUNNING FOR COURT COMMISSIONER**

**EARL L. PHILLIPS**  
Earl L. Phillips, Pontiac attorney, has filed nominating petitions as candidate for the office of Circuit Court Commissioner on the Republican ballot at the September primary election.  
Mr. Phillips was born and raised on a farm near Marlette, in Sanilac County, Michigan, and received his early education in that community. He taught in the public schools of Lapeer County for two years, and then entered the University of Michigan, where he took literary work, and afterwards the law course, graduating from the University of Michigan Law School in 1916.  
Mr. Phillips served in the United States Army during the World War, and in 1919 established a law office in Pontiac where he has practiced his profession ever since. He is married and lives in the city of Pontiac.  
There are two Circuit Court Commissioners in the County, one in Pontiac, and the other in Royal Oak, and Mr. Phillips is the present incumbent of the Pontiac office.

**"TRY IT YOURSELF MR. HUSBAND!"**

You try doing the housework with a lot of cold, clammy water. You try fooling around waiting for water to heat—depending on furnace coils after furnace weather (do you know how much fuel they waste in the winter, too?)  
**DO HUSBANDS KNOW?**  
Husbands know what comfort there is in an ever-ready supply of hot water for shaving and the bath at any and all hours. But most husbands don't realize what such hot water means in running the home. Instant hot water for the dishes, for baby's bath, for the laundry, for hurrying cooking, for housecleaning, for the hundred and one things that are a regular part of every woman's busy day.

★ To the modern home conveniences now operated by electricity—the electric washer, refrigerator, vacuum cleaner, radio, toaster, percolator, range, iron, fan, and electric lights—there has been added Electric HOT WATER at a low flat rate. Under the terms of this new service offered by The Detroit Edison Company to its customers, 10c a day provides 60 gallons of hot water, and 12c a day 80 gallons. This low rate is made possible by heating the water electrically during the night, at a time when the demand for electricity for other uses is lowest. The water thus heated is stored in a well-insulated tank, where it is available for use during the next twenty-four hours.

is located in the top of the tank, which automatically turns on to heat additional water. The electricity used to heat this additional water is registered by the electric meter and charged for at the usual rate. An electric water heater may be either bought or rented. Rental rates for heaters are low, and if you prefer to buy the heater, convenient monthly terms may be arranged. Customers who wish electric hot water in the summer months only, when the furnace is off, may get this service at a slightly higher rate—about 13c a day for 60 gallons, and 16c a day for 80 gallons.

A supply of hot water is indispensable for countless daily household uses. In summer especially, it is in demand for cooling and refreshing baths and for invigorating showers. Let us install an electric hot water heater in your home today. Telephone or bring your order to any Detroit Edison office.
