TELEPHONES PLAY-BY-PLAY HOLD-UP STORY TO PAPER

A play-by-play story of a bank hold-up was turned in to the Toledo, O., News Bee the other day, and the man who performed the feat was not a regular reporter, at that. He was H. R. Adler, an employee of the circulation department. But a newspaperman is primarily a newspaperman, no matter in what department he works, and Mr. Adler proved this once again.

While covering his territory, he was in Fortoria, O., calling his office in Toledo by long distance when the First National Bank of Fortoria was held up. Hearing the shooting as the bandits fought their way out of the bank with machine guns, and getting a quick word picture of what was going on from persons near the telephone, he transmitted the information to the home office of the News Bee, the call there being quickly transferred to the managing editor.

Adler proved that he had all the instincts of a reporter when he gave a rapid-fire account of the robbery, of the kidnapping of two bank employees, of the machine battle with the police, and of the scenes in the street, with people diving for cover and bullets flying as the bandit car sped out of town. The managing editor in Toledo was able to hear the shouts of the people on the street as Adler telephoned the story.

Entered for Futurity Races

The name of the race in which horses are entered before they are foaled is "Futurity race." The dam is entered before the foal is dropped, or the foal is entered when a few months old. The race is not run until the foals are two-year olds. The three important futurities in the United States are: The Futurity, Western Breeding association; the Fim-Hec Futurity, Pimlico, Md.; the Breeders' Futurity, Lexington, Ky.

SET MANY PINES

More than 3,050,000 white, Norway and jackpine seedlings and transplants were set out during the past spring in state forests and game refuges, according to the Forestry Division, Department of Conservation.

This total nearly equals the entire year's planting of 1933. Last year 5,709 acres were planted to 3,565,000 seedlings and transplants. Last spring's acreage was 4,901.

A full week's pay for half a week's work is just plain dishonesty.

'Inside Dope' on the Hand Telephone

This X-ray photograph of a telephone hand set, made at the Bell Telephone Laboratories, reveals clearly the positions of the transmitter and receiver units and the conductors in their solid molded frame. The smaller picture shows the hand set as it appears to human eyes. Scientists at the Bell Laboratories make frequent use of X-ray photography for studying the structure of metals and other solids.
