ADVERTISEMENTS Are Your Guides To Value

Experts can roughly estimate the value of a product by looking at it more accurately, by handling and examining it. Its appearance, its texture, its feel and the balance of it, all mean something to their trained eyes and fingers.

But no one person can be an expert on steel, brass, wood, leather, foodstuffs, fabrics, and all of the material that makes up a list of personal purchases. And very experts are fooled, sometimes, by concealed flaws and imperfections.

There is a surer index of value than the sense of sight and touch... knowledge of the maker's name and for what it stands is the most certain method, except that of actual use, for judging the value of any manufactured goods. Here is the only guarantee against careless workmanship, or use of shoddy materials.

This is one important reason why it pays to read advertisements and to buy advertised goods. The advertised product is worthy of your confidence.

Merchandise must be good or it couldn't be consistently advertised.

BUY ADVERTISED GOODS

USED 980 VACUUM TUBES IN ROUND-WORLD CALL

Enormous Amplification Needed for Telephone Conversation Which Circled the Globe

When President Walter S. Gifford of the American Telephone and Telegraph Company and T. G. Miller head of that company's long line of "round-the-world" calls, a few months ago by talking around the world to each other by telephone, the vacuum tube, that modern Aladdin's lamp, played an important part in the conversation. How important, a few figures will make clear.

The two men were in adjoining offices, scarcely 50 feet apart, as Mr. Gifford's voice traveled westward and reached Mr. Miller's ear from the east, while the latter's words journeyed in the opposite direction and arrived from the west. In each round-the-world circuit, 40,000 tubes were employed, a total of 980 for the two-way conversation.

Many of the vacuum tubes were in telephone repeaters along the wire lines stretching between New York and San Francisco. Still others were in radio telephone transmitters and receivers which sent the electric waves across vast distances of ocean and received the enfolded radiations after their long sea voyages. About 85 per cent of the distance around the world was covered by the radio telephone links, the remaining 15 per cent being in telephone wires. Some of the vacuum tubes were no bigger than those used in a home radio receiver, others were several times larger, and yet others formed giant water-cooled transmitting tubes.

The strength or power of electric waves, whether traveling by wire or radio, diminishes with distance.

WEST FARMINGTON

Mrs. John Tamm attended a shower in honor of Mrs. Ferris Ford. Mrs. Ferris was formerly Miss Boswick.

Mr. Lawrence Sherman of North Star has been spending last week with relatives here. He called on his aunt, Mrs. Florence Bachelor, Saturday afternoon. He spent nearly a week with his cousin, Miss Starr Graham and family. He left for his home Monday.

The West Farmington Ancient Order of Oddfellows held their meeting at the home of Mr. and Mrs. Starr Graham Thursday evening.

The West Farmington school was closed Monday and Tuesday on account of a death in Mrs. Gibson's family.

Mrs. J. C. Cox entertained last night a bridge circle at her home Tuesday afternoon.

The Walled Lake school is having semester examinations Tuesday and Wednesday.

The pupils from here who attend Walled Lake school will be home Thursday and Friday as the teachers will be making out reports.

There will be an act dramatized at the Methodist Church Sunday evening. It will be put on by home talent of the W. C. T. U.

The Walled Lake W. C. T. U. will be held at the home of Mrs. Mason February 4.

Great Barrier Reef

The Great Barrier reef extends along the Queensland coast of northeastern Australia 300 nautical miles.

Gatun Lake

Gatun lake, the summit in the Panama canal, is only 85 feet above the level of the sea.

Art of Engraving Stones

The art of engraving stones is believed to have originated in south Mesopotamia.

The Ginger Plant

The flowers and leaves of the ginger plant are borne on separate stems.

West Virginia Admitted in 1863
The state of West Virginia was admitted to the Union June 20, 1863.

MARSHALL SMITH, Attorney, 1490 Postoffice Bank Building, Pontiac, Mich.

STATE OF MICHIGAN, THE PROBATE COURT FOR THE COUNTY OF OAKLAND, Docket No. 10, 1935.

At a session of said Court, held at the Probate Office in the City of Pontiac, in said County, on the 23rd day of January, A. D. 1935.

Present: HON. DAN A. McFARLAND, Judge of Probate, and F. E. JUDGE, Clerk of Probate.

Maxwell Stanley (sometimes known as Stanley) deceased.

Faith Stanley, administratrix of said estate, having filed in said Court a petition praying that the said estate be administered in accordance with the provisions of said act, and that said estate be limited and divided in the manner and to the persons named in said petition, and that said petition be granted, and that said estate be limited and divided in the manner and to the persons named in said petition.

It is ordered, that four months from this date be allowed for creditors to present claims against said estate.

It is further ordered, that the said estate be administered in accordance with the provisions of said act, and that said estate be limited and divided in the manner and to the persons named in said petition.

Attest: Dated January 26th, 1935.

John J. Walsh, Attorney for Mortgagee.

324 Penobscot Building, Detroit, Michigan. Jan. 30-Feb. 13

Primary Notice to Voters And Candidates of Livonia Township

Primary elections in Livonia Township will be held Monday, March 2, 1936, R. J. Levanowski, Livonia Township clerk, has announced. The polls will be open at 7 a. m. and close at 8 p. m.

Precinct number one is located at Seven Mile road and Farmington road, better known as the West Point Community hall.

Precinct number two is located at Sheldon's Land office in Rose-dale Gardens on Plymouth road.

All candidates must have their petitions filed to the township clerk before 4 p. m., Tuesday, February 11.

This is a special election to the voters of Livonia Township for the purpose of voting on a salary for the supervisor, clerk, and township treasurer.

Chevrolet Retail Sales Show Gain Over Dec. 34

Retail sales of Chevrolet cars and trucks in the second 10 days of December continued at a record-breaking rate, according to figures released recently by the Chevrolet Company. They totaled 31,789 units, an increase of nearly 200 per cent over the same period last year, and 31 per cent over the high figure established in the preceding 10 days. These figures brought the total for the first 20 days of the month to 55,015 units, as compared with 22,792 in the first 20 days of December, 1934.

Used car sales also showed a sharp upward trend. The second 10 days' sales were 42,534 units, as compared with 16,274 in the second 10 days of December, 1934, and 36,911 in the second 10 days of November. The first 20 days' used car sales were 77,889 units, an increase of 54 per cent over the same period last year.

Present new car schedules for January, it was announced, are 110,000 units which will require peak production throughout the month. Light of the fact that orders are still arriving from dealers in large volume, heavy output is indicated through February and probably well into spring.

First Acts of U. S. Navy

The American navy came into existence in 1775 after the close investment of Boston by Washington had cut off all supplies to the British troops, save such as might arrive by water. To intercept these, some small vessels were armed and manned by New England seamen, first under the auspices of Rhode Island and Connecticut, and afterward by authority of the congress, which organized a naval committee with John Adams at its head. These little crafts not only deprived the enemy of supplies, but captured enough prizes to furnish the Colonial army with war material without which it could not have continued hostilities.

Reward for Science

In 1713 the British government offered rewards of £50,000, £75,000 and \$100,000 respectively, for the discovery of the means of finding longitude at sea with an accuracy of 60, 40 and 30 minutes. At that time the problem seemed unsolvable. John Harrison made his first successful chronometer in 1735 and got the \$100,000 in 1773. Today standard time can be easily found at sea with an accuracy of 1/1000 second, from wireless signals.

THRILLING STORIES for BOYS

BUT YOU'RE... Not a Bear!

It's pretty soft for old John Bear. When winter comes he retires to his cave, pulls the hole in after him, and lives snugly off his own providence until Spring breezes blow... Unfortunately humans can't do this—but you CAN do the next best thing. Put good BLUE BEACON coal in your fire right now, and forget your worries about the coming winter. Remember—8 tons of BLUE BEACON go as far as 10 of ordinary coal. It pays to buy quality.
