SMOKERS BLAMED FOR MANY FOREST FIRES DURING 1935

State Conservation authorities are blaming the 1935 fire report which shows—for the sixth successive year—that approximately 50 per cent of the forest fires in the state were supposedly due to careless smokers.

Of the 1,437 fire occurrences last year, 741, or more than half, are blamed on smokers. In 1934 the rate was 49.37 per cent.

That the man with tobacco and matches in the woods is the greatest menace of Michigan's forest lands and the most difficult to combat is apparent from these facts, state men say. Conservation authorities have been groping for some means of reducing the rate of smoker fires and have tried every reasonable means, short of actually closing off certain areas in high hazard regions to smokers and the use of fire in any way. The chief fight against careless smokers has been through popular appeal and education.

However, a law passed by the 1935 legislature makes it possible through proclamation by the governor to close off certain areas of forest land to fire-users during times of drought. This law may have to be invoked when necessary to overcome the smoker hazard.

Of the 1,437 forest fires, 946 occurred in the lower peninsula; 511 in the upper peninsula. Fires by causes are: Smokers, 741; brush-burning, 256; incendiary, 131; miscellaneous, 112; campfires, 87; railroad, 47; unknown, 41; lightning, 22; lumbering, 17.

STATE PROFESSOR GIVES RECEIPT FOR DELICIOUS CATTLE

When cattle rub against posts and buildings in winter, it is a pretty good indication they are suffering from an infestation of lice, says C. B. Dibble, of the Michigan State college entomology department.

Many inquiries have come to the animal husbandry department of the college, asking for ways of delousing. A bulletin on cattle lice may be obtained by writing to the entomologist.

When fall control has been neglected and emergency measures are necessary in winter, lice powders are the only safe desirable control, the entomologist advises.

Commercial lice powders containing pyrethrum and derris, but without such poisonous materials as arsenic, fluorine, nicotine or kerosene may be used.

A horse remedy recommended by Mr. Dibble would include one pound of pyrethrum, three pounds of flour, and four pounds of horse powder for a total cost of 50 or 75 cents per acre.

One-fourth of a pound should be used per animal with the treatment repeated in 14 days. Bedding should be cleaned each time. If blue lice, which do not respond to this treatment, are present, six ounces of powdered malathion or moth balls should be added.

SPRISSE PARTY GIVEN FOR MISS FRANKLIN

A farewell surprise party was given for Miss Marion Franklin at her home on Twelve Mile road, by her two closest friends, Miss Ruth Smith and Miss Gladys Neuman. The party was on Friday evening, February 7. More than 40 attended.

Most of the evening was spent on Farmington High School. Games were played and refreshments were served by Mrs. M. C. Franklin. Miss Franklin received several nice gifts from her friends.

CHANGE OF ADDRESS

Ample notice of change of address should be given when moving. Notice should be given before changing if possible.

By allowing as much time as possible to make changes in address, readers avoid delay or missing issues of the paper as well as costly confusion in the postoffice.

Second-class mail is NOT forwarded by the postoffice if no new address of the subscriber—consequently the subscriber must notify copy of the publication.

the publication beforehand in order to be sure of receiving his

MEN ASK FEDERAL AID TO CONTINUE MICHIGAN HIGHWAY

Michigan highway authorities joined those of other states last week in Washington in an effort to safeguard Federal Aid construction funds at the present session of Congress.

State Highway Commissioner Dr. Van Wageningen and G. D. Kennedy, business manager for the state highway department, lined up with other state highway officials in not only urging the usual Federal Aid appropriation but also to seek a four-year Federal Aid program.

The Washington meeting was called by the American Association of State Highway Officials, and included representatives of highway commissions and highway construction such as the cement industry.

Enactment of the soldiers' bonus statute and other threats to drain national revenues have made highway authorities fearful that Congress will seek economies with other appropriations. Although the last Congress provided for the usual Federal Aid for the next fiscal year, the provision was voided without an appropriation at the present session of Congress.

Michigan is scheduled to receive \$3,000,000 in Federal Aid funds for the fiscal year beginning July 1. It must match these funds to get a combined program of \$7,000,000 is planned in this state.

ANTI-TUBERCULOSIS FORCES MARK NEW GAINS IN FIGHT

Anti-tuberculosis forces in Michigan this week noted another milestone in the state's organized fight against the disease, as figures released at Lansing by the Michigan Tuberculosis association showed that more than 100,000 persons have been tuberculosis since November, 1931.

The association's report revealed, too, that during the same period, chest X-rays were made of over 20,000 Michigan people.

Dr. Bruce H. Douglas, president of the association, in commenting on the four-year figures, pointed out that in the not-so-distant day of the old chest clinics, three or four times four years would have been a more likely period for the examination of 100,000 people.

Since the opening of the present school term, 9,422 tuberculosis tests have been given by the association, and 1,424 chest X-rays have been made. While findings on a more satisfactory basis, the X-rays have been returned, six new adult cases have been discovered; one hundred twenty-four childhood type cases have been found.

\$274,000,000 SPENT ON STATE ROADS SINCE 1920

More than \$274,000,000 has been invested in Michigan's trunkline highway system during the last 16 years.

This figure was determined from a survey of Michigan's trunkline and disbursements since January 1, 1920, announced today by Murray D. Van Wageningen, state highway commissioner. This money, has been derived from federal apportionment and state gasoline and weight taxes. Total revenues from all these sources have been \$426,928,855.71. The difference of approximately \$152,000,000 between the figure and the amount spent on state trunk line highways represents the amount returned to counties from weight and gas tax receipts by the state highway department.

The federal government has provided funds for highway construction in Michigan to the extent of more than \$56,000,000. State participation over this period totals \$218,000,000. Federal grants have been received for a few aid and weight relief grants. Of the total amount granted to this state by the federal government, more than \$16,000,000 has been received during the last two fiscal years.

While federal appropriations in the last two years have been larger, state funds for new construction have been notably lacking. According to the study, only a few years ago state funds to the extent of \$25,000,000 were not unusual. In each of the last two years state funds have been limited to approximately \$5,000,000.

In his connection with the study, Dr. Van Wageningen pointed out that more than one-third of the total amount returned to the counties from the gasoline and weight taxes since 1920 had been turned over in the last three years.

The year 1920 marked the charting of Michigan's program of state highway development. This was made possible through an act approved by the state legislature in 1919.

Sergeant: "I told you to draw your feet, Smith. Don't you know you're the size of a pig?"

Smith: "Yeah, a boatload of sergeant's slinking."

WEST FARMINGTON

Mr. and Mrs. Frank Pennele are parents of a baby girl Nancy Pennele born February 3.

Mr. and Mrs. Slayback are moving to the Mrs. William Wedow farm.

On account of the cold weather only a few members could get out to attend the Women's Christian Temperance Union at Mrs. Mason's last week. The meeting was postponed until Wednesday afternoon of this week.

Mr. and Mrs. Starr Graham called on Mrs. Frank Pennele and baby Sunday afternoon.

Mrs. Elmer French and son Russell French and granddaughter Lucille Swanson of Marquette spent a few days with Mr. and Mrs. Smith Green.

Mrs. Elmer French entertained seven ladies Tuesday afternoon at a sewing circle.

\$14,000,000 IN MILK MARKETED IN DETROIT AREA

During the past twelve months the Michigan Milk Producers Association in the Detroit market alone marketed nearly \$14,000,000 worth of milk for 12,220 shippers in 17 counties.

The producers in the Detroit market, by the adoption of the delegates in the winter of 1933, started the base and surplus plan of paying producers for their milk. Marketing organizations in every city have some method of paying their member-producers in proportion to the way they furnish milk to the market from month to month.

During this same twelve month period \$71,632,287 pounds of milk was shipped by the producers to the market. Of this amount 37 per cent was base milk and 12 per cent was surplus. The base price of a c. o. b. Detroit averaged \$2.11 per cwt. for the year and surplus milk at the local receiving station averaged \$1.01.

As a marketing organization, the association sold 60 per cent of the milk as Class I with an average price of \$2.44 a c. o. b. Detroit for the past year. During the same period 4 per cent was sold as Class II and brought \$1.53 a c. o. b. Detroit, and 36 per cent had to be sold as manufactured milk, or Class III, with an average for the year of \$1.15 per cwt. delivered local receiving stations.

Another interesting comparison is for each 100 pounds of milk sold for producers in the Detroit market during the past year, an average price of \$18.90 per cwt. for 3.5 per cent milk, a c. o. b. local station, in which the association was received. This was computed as follows:

(F. O. B. local station)
Class I—60 lbs. @ \$2.44—\$1.46
Class II—4 lbs. @ 1.53—.61
Class III—36 lbs. @ 1.15—.41

In all the nine markets of the service members, over one-third of Michigan's dairy products is marketed co-operatively through this farmers' co-operative marketing organization.

Peter the Great Aided Russia

Peter the Great, who ruled Russia during the early part of the Eighteenth century, transformed Russia from a backward country into a mighty empire. He established schools, hospitals, a military and naval academy, built cities and enlarged his country's borders both in Europe and Asia. He traveled widely in Europe, greatly broadening his knowledge which would enable him to improve his country.

He studied navigation, engineering and shipbuilding. He learned the secrets of shipbuilding he worked for seven weeks in a Dutch shipyard.

Pure Copper Pink Color
Pure color is not exactly copper colored, but rather a silvery pink. The color is the result of the partial obscuring of this natural color by a thin coating of the darker colored copper oxide. But the color is not gold and some of its alloys, with Dr. Thomas M. Beck, in the Chicago Tribune, are not due to any such oxide film. The gold is exceedingly reluctant to combine with oxygen. Rather they are due to the actual color of the metal.

HORSE BREEDERS PLAN EXHIBIT AT 1936 SHOW

Michigan horse breeders, encouraged by their success in 1935, have voted to make another exhibit at the 1936 International Live Stock exposition.

Eighteen Michigan farmers, it was announced at a meeting of breeders recently, exhibited 43 animals at the exposition last year, and about 40 to about 50.

The Michigan exhibit was awarded first place as the nearest and most attractive exhibit at the exposition. The premium money and expenses were donated to the Michigan Horse Breeders' association, working with the department of agriculture and Michigan State College, supported the exhibit and appropriated funds sufficient to care for the expenses, as the breeders were not at any great financial outlay.

Speakers at the meeting in which the decision for 1936 was made were James Thomson, commissioner of agriculture; C. C. Kelly, superintendent of exhibits, Michigan State Fair; and Prof. G. A. Brown, head of the animal husbandry department, Michigan State College.

HIGH HEELS SEEN AS CONDUSIVE TO INFERIOR POSTURE

High heeled shoes make for inferior body posture if worn for any length of time, a study conducted by the Home Economics Department at Michigan State College, East Lansing, has shown.

The study, conducted by Miss Julia Teal, revealed there is a definite relation between increased heel height and poor body posture. It indicated, too, that an inferior standard of posture heel height exceeded 1 1/2 inches than when low, and medium heels were used.

Fashions in other types of clothing may be followed with no fear of injurious effects so far as health is concerned, the study showed. It also showed that shoes, especially those which are poorly fitted, should not be worn for long periods of time, as they affect one's health and comfort.

Miss Teal recently questioned 100 women and learned that 67% considered their shoes to be uncomfortable and that 65% gave their shoes away before worn out. Some gave as many as 10 pairs of shoes away in one year, she added.

Comfortable shoes should have adequate length from heel to ball of the foot, room for fourth and fifth toes to extend forward normally, a flat inner sole without bumps and raises, and an inner sole sufficiently straight to avoid lateral deviation of the foot.

Some health and fashion hints in choosing shoes are:

Shoes should be comfortable as well as fashionable and good looking.

Shoes are a part of a costume and the color, design, and general type of shoe should harmonize with the costume.

Simplicity of design in shoes is desirable because it is better taste and also more economical in the long run.

Shoes receive hard wear and the kind and quality of the materials used in the shoes influence the general satisfaction from them.

Most Primitive People
The natives of Tasmania, even up to the time of their complete extinction in 1876, were considered to be the most primitive people ever encountered in historic times, writes Herbert Illmer, Cincinnati, Ohio, in Collier's Weekly. They were considered a degree of development that of the cave men who lived in central Europe more than 25,000 years ago.

ECONOMY SALE CONTINUES TO SATURDAY, FEB. 22

Because of the recent cold weather we have decided to continue our sale for one more week.

Quality products at remarkable savings are being offered in this sale.

Northville, Michigan. No. 333

STATE OF MICHIGAN, JESSE COUNTY OF OAKLAND. SSS
Bull pending before Earl L. Phillips, a Circuit Court Commissioner for Oakland County, between John P. Lamb and George A. Hahnfeldt, as defendants.

Summons having been issued in this cause and having been returned unsworn as to the defendant, the Court do hereby order that the plaintiff appear at the Court in person or by attorney, on the 15th day of March, 1936, at 10 o'clock a. m. Eastern Standard Time, at the Court House in Pontiac, Michigan, to answer the complaint filed in this cause, or judgment rendered by default, and that this order be served by mail on the defendant by the Clerk of the Court.

This suit is brought to terminate the claim of the defendant in certain land contract for the sale of premises described as follows: The Township of Waterford, Oakland County, Michigan, to-wit: Subdivision No. 3, according to the Record of Deeds for said County in Liber 9 of Plats on Page 6.

MR. J. PHILLIPS, Circuit Court Commissioner, Oakland County, Michigan. Dated: January 29th, 1936. Feb. 6-26, 26

Loan No. 191755-14-209
MORTGAGE-Default has been made in the conditions of a mortgage made by CHAS. L. MCGEE, a single man, to UNION TRUST COMPANY, a Michigan Corporation, dated March 22, 1929, and recorded on April 2, 1929, in the Record of Deeds for said County in Liber 9 of Plats on Page 6.

Summons having been issued in this cause and having been returned unsworn as to the defendant, the Court do hereby order that the plaintiff appear at the Court in person or by attorney, on the 15th day of March, 1936, at 10 o'clock a. m. Eastern Standard Time, at the Court House in Pontiac, Michigan, to answer the complaint filed in this cause, or judgment rendered by default, and that this order be served by mail on the defendant by the Clerk of the Court.
