STATE LAUNCHES ROAD RE-SURFACING PROGRAM

The state highway department has hard-surfaced nearly 1,200 miles of trunkline highways in Michigan the last three years.

The increase in hard-surfaced roads has been comparable with the trunkline additions in the last three years. In 1932 the total maintained mileage was 8,312.54 miles compared with 4,632.21 at the present time.

Although many miles of gravel highways have been hard-surfaced in the last three years, the mileage of gravel roads has not been reduced proportionately. There are now 3,307 miles of gravel roads in Michigan compared with 3,515 miles in 1932.

Most of the construction in the last three years has been carried out with federal funds. The fifth of all state highway revenues are now returned directly to the counties.

RAILROAD ALMANAC DISCLOSES FACTS ABOUT BUSINESS

The first eight cents of every dollar earned by the railroads of Michigan are turned over to the state as "tax" according to the "Michigan Almanac," just issued by the Michigan Railroads Association.

"Everyman's Almanac," a 40-page booklet, gives the first outline ever printed of the magnitude and commercial and economic relationship between the state and its railroads.

News items are always welcome by this newspaper.

European Countries Use Variety of Pozy Emblems

Not all the countries of Europe possess a flower emblem. At least authoritative mention of such a badge is not made in the case of more than a few countries.

The flower of England is the rose. This choice daisy back to the days of the Normans, when that branch of the royal family known as the House of Lancaster chose a red rose for its badge, and the rival branch, the House of York, a white rose.

The flower of Scotland is the thistle; the badge of Ireland, the shamrock; that of Wales, the leek. The golden lily, or fleur-de-lis, has been the national flower of France ever since the time of Clovis, king of the Franks in the latter part of the fifth century.

The violet, which is the national flower of Greece, was also adopted by the emperor Napoleon and the imperial party that followed him. The flower of Germany is the Kaiserblume, the favorite flower of former Emperor Wilhelm II.

Sacred Role of Hebrides

Only 3 1/2 Miles in Length

The island of Iona, the sacred site of the Scotch, is the birthplace of Scotland's nationality, culture and religion, and the Church of St. Columba might be called the Westminster Abbey of the island.

In A. D. 563 Columba and his 12 disciples went there from Ireland, where he had established some 40 monasteries, to evangelize the wild Picts and Scots.

Yet the eighteenth century Doctor Johnson wrote, "That man is little to be envied whose patriotism would not gain force upon the plain of Marathon, or whose piety would not warm him among the ruins of Iona."

Mandrake Plant Superstition

The root of the mandrake of history, namely, the mandragora, is supposed to become forked and resemble the human form. In this condition it was used as an aphrodisiac. It is allied to belladonna and has poisonous qualities.

The Tiger Beetle

The tiger beetle is a very graceful and beautiful colored insect. They are the most agile of all the beetles, and are not only swift runners but can also fly. They may be found on the sand in the open, beaten paths, or on the shores of streams.

Eskimos Have Allments

Although a healthy and organically sound race, the Eskimos are seriously susceptible to ailments which ordinarily cause the most only minor discomforts. Before the coming of the white man the Eskimos knew nothing of such common ills as cold, influenza and other ailments.

Mechanics of an Eclipse Simple, Scientist Says

The mechanics of an eclipse is extremely simple, states a scientist in the Montreal Herald. As the moon goes around the earth in a monthly orbit there will be a position in each revolution when the earth will lie between the moon and the sun.

However, the plane of the lunar orbit makes a small angle with the ecliptic, or plane of the earth's orbit, and this angle is large enough to carry the moon above or below the earth's shadow in space on most lunar revolutions.

Eclipses of the moon, even total eclipses, do not interfere with the scientific importance of total solar eclipses. They reveal to our sight no important phenomena which are otherwise unseen. The most important observations which astronomers can make at such times are only for the purpose of checking up on the predicted and observed times.

Smallest Isolated Group Resides on Midway Island

Perhaps the smallest isolated group of people living under the American flag are the inhabitants of Midway Island, Midway, extending almost to the extreme western end of the Hawaiian archipelago, is 1,800 miles from Honolulu.

Outlaw Dogs Kill Number of Deer

Reverting to the wild, two large dogs have gone berserk in the woods near Alpena, slaughtering an unknown number of deer. From the carcasses found in the woods it is estimated that as many as 20 deer may have been killed.

Oldest Game

The oldest game played in the United States, or on the entire North American continent for that matter, is lacrosse. The name was given by French colonists in Canada to the ball game in that sport of baggataway, once a favorite sport of the Iroquois.

The Robber Flies

The robber flies are mostly large flies. Their body is long, with slender abdomens, although some species are quite stout, resembling bumblebees. These flies not only destroy other flies, but insects such as dragon flies, tiger beetles, and dragon flies. They also feed upon the larvae of these insects.

Where Flag Flies Continuously

The flagpole at Washington is the only building in the United States over which the American flag is allowed to fly continuously, both day and night, throughout the year.

Classification of Mexicans

The Mexicans are classified as belonging to the white or Caucasian race. There is a dominant white population of Spanish descent, but there has been intermarriage with Indians and some negroes.

PONTIAC MOTOR CO. TO HOLD NATIONAL ECONOMY TRIALS

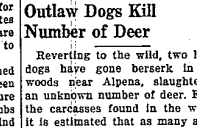

Two new Pontiac cars as leading prizes and an additional list of 164 cash prizes are being put up by the Pontiac Motor Company as national awards in economy contests to be staged by the company's dealer organization in April.

Every United States resident over 17 years of age and legally qualified to drive is eligible to compete and test his driving skill over a prescribed route accompanied by an observer to assure full compliance with all rules governing the contest.

First prize is a new Pontiac Eight two-door touring sedan, and second prize a new Pontiac Master six two-door touring sedan. Other prizes range from \$300 cash for third place, \$100 for fourth, \$100 for fifth, \$50 for sixth, to ten equal prizes of \$25 each; fifty of \$10 each, and 100 of \$5.00 each.

CHEVROLET SPREADS EMPLOYMENT OVER WINTER MONTHS

Chevrolet has already built more than 530,000 1936 model cars and trucks. It was revealed here today by M. E. Coyle, president and general manager of the Chevrolet Motor Company.

Mr. Coyle's statement was made in answer to a question as to whether the earlier announcement of 1936 models had succeeded in leveling out employment to greater degree than in previous years.

"Using the case of Chevrolet as an example," said Dr. Coyle, "we have already produced over 530,000 1936 cars and trucks. These were built during the winter months when employment would normally have been low.

"We have delivered cars to those financially able to make their purchases during the winter months. We have supplied our dealers with adequate stocks of new cars in various models and colors, so they are prepared to make immediate delivery. During the spring months we shall build sufficient cars to maintain dealers' stocks at proper levels.

"Therefore, as originally planned, this production and its consequent employment — formerly known as 'dead-end' — is being eliminated."

Man Kills Coyote With Automobile

With both hands on the steering wheel of his car, John Nesbitt of Cedar River killed a coyote. Nesbitt was driving a loaded truck for the county road commission when he saw a coyote leaping down the road in the path of his car.

He didn't know it. She: "You deceived me before our marriage. You told me you were well off." He: "I was, but I didn't know it."

SPRING Is In The Air

...and that means only one thing. Week end motor trips, short rides on warm, bright afternoons and spins out to cottages and lodges. The most perfectly planned outings can be spoiled when your old car "acts up."

To really enjoy motoring this spring, trade in your old car on a new, 1936 FORD V-8. One short ride is all that is needed to prove to you that you get more exhilaration and thrill, per dollar invested, out of driving a new Ford V-8 than any other low priced car sold today.

We can make prompt deliveries of all the new sport models so popular during the warm months, and just think, you can buy ANY style for ONLY \$25 a month plus a liberal allowance on your old car as partial or full down payment on a new Ford V-8.
