

LOCALS

Mr. and Mrs. Harold Bailey have returned from a three day visit with Mrs. Bailey's sister and brother-in-law, Mr. and Mrs. Guy Freeborn of Hart.

Mrs. John Hess of New Hudson formerly of Farmington, attended the Good Friday Union Service here.

Mrs. Frank Sanford of South Bend, Ind., is visiting her aunt, Miss Esther Boynton, this week.

Mr. and Mrs. Clyde Chamberlain and Mr. and Mrs. C. W. Wilbur were Easter Sunday guests of Mr. and Mrs. Chamberlain's daughter, Mrs. P. J. Tucker and children at Grosse Pointe Farms.

Don Walters and a party of his friends enjoyed a fishing trip to Bay Port Tuesday.

The Double-Eight club and its guests enjoyed a dancing party at the West Point Community hall last Thursday night.

Mr. and Mrs. Curtis Barker of Lansing were Easter Sunday guests of Mrs. Barker's parents, Mr. and Mrs. Lloyd Gullen.

The Monday night contract bridge instruction club met with Mrs. John Bulmiphe. The guest substitutes were Mrs. Arthur Lamb, Mrs. Cecil Habermehl, Mrs. Harold Hurkett and Mrs. Walter Coon.

Mr. and Mrs. T. A. Brown of Detroit, Mr. and Mrs. Perry Wikom, Ida Steele, Zaida Steele, Adeline Wikom and Harold Jamison, were dinner guests of Mr. and Mrs. Alfred Smith on Sunday. The dinner was in celebration of the birthday of Mrs. Brown, Zaida Steele and Mrs. Smith.

Mr. and Mrs. James Layn motored to Paw-Paw on Sunday and were guests of Mr. and Mrs. M. C. Cuddeback.

The missionary society of the Universalist church will meet with Mrs. Alfred Smith at 2 o'clock on Saturday afternoon. Mrs. Frank Adams of Oak Park, Ill., who is a national officer of the society, will be present.

A daughter was born to Mr. and Mrs. William Tamm on April 2.

Mr. and Mrs. Marie Wikom have moved onto the Deering Homestead farm on the Eleven Mile road.

Master Warren Brown, son of Mr. and Mrs. Clarence Brown, is

ill with pneumonia.

Miss Christianity and Miss Ruth Carlisle are entertaining Mrs. Frank Sanford of South Bend, Ind.

Mr. and Mrs. Lewis Mason and sons, Stuart Neil and Edwin Lewis, of Flint, and Miss Carol Crossman of Detroit were Easter Sunday guests of Mr. and Mrs. R. N. Crossman.

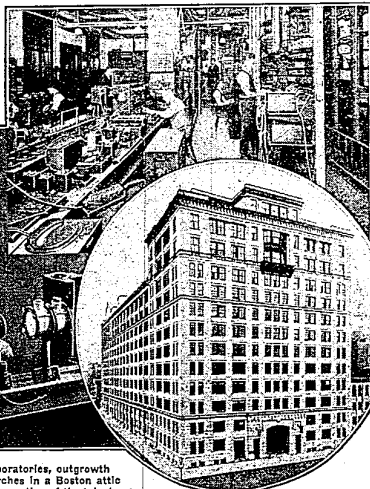

Mrs. John Hamel entertained several neighborhood friends at cards at her home on Wednesday afternoon.

Mr. and Mrs. Albert Beaver, daughter Elleen and son Edward, of Grosse Pointe, Mr. and Mrs. Thomas Moore and family of Detroit, Mr. and Mrs. Norman Grimwade and son Ronald of Chelsea and Mr. and Mrs. Samuel Billing were Sunday guests of Mr. and Mrs. Albert Grimwade.

Dorothy Susan Warner, who attends the Liggett school in Detroit, spent the Easter Sunday weekend with her mother, Mrs. Tom Edwards.

Telephone Laboratories Are Scene of Research in Transmission of Sound

Right: A research laboratory, one of many in the great Bell Telephone Laboratories where 4,200 people devote their time to the improvement of telephone service and equipment. Below: Micro-manipulating tools facilitate dissection under the microscope.

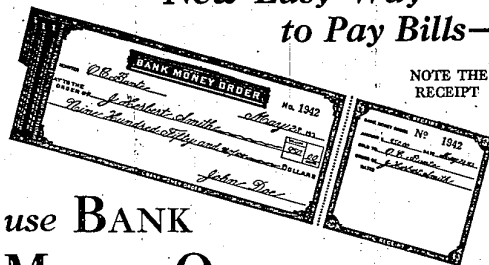

In circle: The Bell Telephone Laboratories, outgrowth of Alexander Graham Bell's researches in a Boston attic over 60 years ago which led to the invention of the telephone.

Facing the Hudson River in New York City stands a 13-story building which houses the laboratories of the Bell Telephone System. Here are developed and designed new or improved systems for electrical communication, following researches directed toward cheaper or easier or more reliable ways of transmitting information electrically. Scientists and engineers develop and design apparatus for the transmission of sound, of pictures, of printed words. An important phase of their work has to do with the design of switchboards and switching equipment, since it must be possible to connect any telephone with any other telephone, anywhere, easily and quickly. Chemists,

physicists, metallurgists, biologists, botanists, carry on investigations in these laboratories. Some of the most important researches are of a psychological and physiological nature. The electron is studied intensively, not only because it carries electricity through wires but because it is vital to the vacuum tubes which are used in telephone repeaters and in radio telephony. So wide-ranging is the physical plant of the Bell Telephone System, and so enormous the amount of equipment it uses, that no piece of apparatus and no item of material used in its manufacture is too insignificant to enter into the laboratories' research and development work.

New Easy Way to Pay Bills—

use BANK MONEY ORDERS

Next time you have a bill to pay, try this safe, simple, time saving method for remitting money by mail. Just step into this bank and buy a Bank Money Order from a teller. Drop it in the mail and retain the receipt which constitutes a complete record of the transaction and proof of payment. That's all there is to it—and the cost is surprisingly low—less than you'd expect.

RATES:

Not to Exceed \$10.00	5c
Over \$10.00 up to \$100	10c
Over \$100 up to \$150	15c
Over \$150 up to \$200	20c

Balsam Fire in Old World

Balsam fire grew in the Old World as well as in the New and in many countries have been considered from earliest times sacred trees. The Hebrews used it for the ceiling of the Temple of Jerusalem; Greeks thought the fir a priest had to be made by Zeus; the Russians would not cut the tree; the Franks thought it the home of the wood giant; the Norwegians called it the "King of the Forest" and believed the Odin, their ruling spirit, sometimes concealed himself in its branches and from his hiding place threw presents to the peasants. From this legend may have originated the idea of the Christmas tree.

Switzerland's Soil

Switzerland covers a total area of 15,975 square miles, and of this very limited surface 22.6 per cent is barren land. Cultivated parts and Alpine pastures form 53.3 per cent of the country's productive area and 21.8 per cent is forest land. The arable land is of extremely varied composition owing to the complexity of its geographical properties and the diversity of the country's climatic conditions. As a rule the soil is heavy and rich, often very damp and, therefore, particularly suited for meadowland and agriculture. The Alpine regions, on the other hand, are adapted for forestry and pasturage.

Manufacturing Calico

The flowered printed cloth of India was mentioned by historians before the Christian era. When Indian fabrics began to be imported into Europe, about 1631, they were called calicuts. The name came to be applied to all cotton fabrics having an equal number of warp and weft threads crossing each other at right angles.

Rove Tunnel

Rove tunnel is the southern section of the Marseille-Rhone canal, southeastern France, starting near the village of Le Roys and piercing a rocky ridge. It is about four miles long, with a water channel 60 feet wide, and is considered one of the greatest pieces of engineering. It was opened in 1927.

Occupational Therapy

Occupational therapy was used by ancient Greeks and Egyptians, especially in the cure of mental disorders. It became known by this name in the World War when some system of occupation was used in treating disabled soldiers. In 1917 the National association of Occupational Therapists was organized in the United States.

Leningrad, Moscow, Differ

Leningrad and Moscow are like two different countries, rather than cities of the same country. Leningrad reveals much of Peter the Great's fantastic dream of a glittering pseudo-European city transplanted to the North. In the ornate city that was St. Petersburg everything of historic interest remains.

Pay for Murder

In the Bambara country of Central Africa a murderer has to pay compensation for the death he has committed and if unable to do so or the full amount, the responsibility falls upon the chief of the village to pay the victim's relatives.

Bluebeard Lived

The "bluebeard" of fairy tale lore has a historical original, one Gilles de Retz, a French nobleman of the Fifteenth century. Retz was undoubtedly hanged at Nantes in 1440, but not for having butchered his seven wives.

Ride Up to Copper Mine

El Teulete, Chile, possesses an unusual copper mine. It is in a mountain and, as the entrance is at its base, the miners ride up—not down—to reach the various levels. —Jack Lynch, Newark, N. J., in Collier's Weekly.

Midnight Rainbows

Rainbows of great beauty are seen on nights of full moon in Maunaloa valley, Honolulu, as well as in the daytime. Honolulu is one of the few places in all the United States where this phenomenon may be noted.

Crusoe Goes Aways

"Robinson Crusoe" one of the greatest children's classics ever written, was originally intended by the author for the grave London business men and for the seamen of the navy.

Many Cattle in Switzerland

Cattle breeding and milk production are leading factors in Swiss economic life. In the former field, the exportation of pedigreed live stock is one of the principal items.

Acid Test for Foundation

To test the soundness of the foundations of the South Africa house in London, acid was floated in a temporary moat around the building.

"Love" Helps

"Love," said Uncle Eben, "is what seems to make de world go 'round, even if it's only love of money."

Getting and Giving

We are here not merely to get, but to give, and the more we acquire, the more we owe.

LOCALS

Several ladies are attending a benefit bridge and style show on Thursday at Bedell's in Detroit. This entertainment is being sponsored by the Ladies of the Glen Oaks Golf club, to add to the present lounge and locker room equipment.

Miss Minnie Smith and the Misses Ida and Zaida Steele spent Thursday with Mrs. James Eastman and her sister, Miss Anna Thayer, at Mrs. Eastman's home at West Point Park.

Mr. and Mrs. Edward Eaton of Detroit were Farmington callers on Thursday.

Mrs. Ethel Thayer of Pontiac visited Mr. and Mrs. John Thayer on Sunday.

Mrs. John Lapham and Miss El-

leen Lapham were Detroit visitors on Monday.

Mr. and Mrs. James C. Hogle of Ann Arbor were Saturday and Sunday guests of Mr. and Mrs. James L. Hogle.

Mrs. Frank Shears and daughter, Doris, of South Lyon were Easter Sunday guests of Mr. and Mrs. Harry Pagel and daughter, in the afternoon they all visited relatives in Lincoln Park.

Will Pagel and daughter, Betty, Mr. and Mrs. John Thayer and Mrs. Ethel Thayer called at the William Baum home at Wikom on Sunday afternoon.

Chief:—"Your wife reminds me of a girl I used to go with."
Ditto:—"She's always reminding me of the same thing."

Three Game Fish To Have Legal Immunity

Beginning May 1, three well known varieties of game fish will have legal immunity from fishing for a period of almost two months. The law declares that no bluegills, sunfish or warmouth bass shall be caught between the dates of April 30 to June 25 in any of the inland waters of the state.

This complete immunity from legal fishing is provided by law to protect the fish during their nesting season.

The closed season on black bass began Jan. 1 and continues to but not including June 25.

In financial matters no decision is often better than a hasty decision.

From 6,000 Feet Above to 260 Feet Below Sea Level

WHAT appears to be a winding river in the trackless waste of Death Valley's floor is but a mirage, shimmering in the brilliant sunshine. These young women are standing at Dante's View where the sheer cliffs of the Panamint mountains drop more than a mile straight down to the salt-encrusted sink. The Funeral mountains in the left background are 15 miles away. The photograph is by the Union Pacific railroad.
