Sunday School for pupils up to the age 16 at 10:30 a. m.
Wednesday Evening Testimonial Meetings at 7:30 p. m.
CHURCH EDITOR
Grand River Avenue at Farmington Road, Detroit
FREE READING ROOMS in Church Edifice
Open daily except Sundays and holidays, 11 a. m. to 5 p. m.; Tuesdays, 11 to 7:30; Saturdays, 11 to 9. ALL ARE WELCOME

CROWDING CITED AS SPREADER OF BACTERIA
Most dust particles are the airships of bacteria. When bacteria are present in the air, they quickly dry out and die. The lucky ones are those coughed, sneezed or otherwise sprayed onto moist dust particles, upon which these bacteria ride and live so long as moisture may be present.
When bacteria were first discovered, the public was much concerned lest these new enemies fly through the air and attack like germs or mosquitoes. Slowly this concern gave way to the belief that germs are chiefly distributed by direct contact between normal persons or substances harboring the microbes. Now, fifty years later, it appears proved that some harmful bacteria may ride around in the air and that infection may be in-

augurated by breathing this air. This new development has caused a study of the bacteria in the air of work places in Detroit. Dr. Carey P. McCord, director of the Bureau of Industrial Hygiene of the Michigan Department of Health, who supervised this investigation states: "A study has been made to determine the numbers and types of bacteria that may be present in industrial work places. The results show that the air of work-rooms with regard to numbers and kinds of germs present, are no worse than schools, offices and hospital wards." Dr. McCord claims that the real danger of acquiring bacterial diseases in work places is through direct contact. "Our investigation proves that the average industrial worker does not spend a work day of seven or eight hours in a heavily germ laden atmosphere."
The number of bacteria riding in the air on dust particles depends primarily upon the extent of the worker's congestion in the work place upon the effectiveness of general ventilation, the humidity and temperature of the air, together with the amount of activity going on in the workroom. Dr. McCord states that "Overcrowding of workers in factories directly invites the spread of respiratory diseases and in order to prevent overcrowding every worker should be provided at least 25 square feet of floor space."

Hudson Safety Hood Hinged Like Airplane Door
Hudson's new Dash-Locking Safety Hood, like an airplane door, is hinged at the front and cannot blow open because wind only tends to close it tighter. Locked by a latch operated from the driver's seat, theft of ear or parts is minimized because when the car is locked the hood is locked. Photo shows J. A. Purdy, Director of Safety for the Michigan Mutual Liability Company, pointing out the safety features of the hood to Captain M. L. Astor and Stewardess Agnes Spence of the American Airlines.

One Quality of TELEPHONE SERVICE in whatever quantity YOU prefer

SOME PEOPLE need more telephone service than others. That is why we offer it in various amounts and at the lowest possible cost for each amount. You are the one to decide how much service you need... one telephone or more; an individual line for your exclusive use, or a party line to be shared with others. There is a quantity to suit you, priced according to the amount you need or wish to buy.
But no matter what quantity you buy, or how often or seldom you use your telephone... no matter who or where you are, or when you call... there is only one quality of service... the best the world affords.

MICHIGAN BELL TELEPHONE COMPANY
You are cordially invited to visit the Bell System exhibit at the Golden Gate International Exposition, San Francisco, California, which opens February 18.

Salem Evangelical Church
Rev. Carl H. Schultz, Pastor
Worship Service—10:00 A. M.
Sunday School—11:00 A. M.
Eighth Church of Christ, Scientist
Grand River Ave. at Evergreen Rd., Detroit, Michigan
"Love" will be the subject of the Lesson-Sermon in all Christian Science Churches throughout the world on Sunday, Jan. 29.
"The Golden Text" (Psalm 36: 7): "How excellent is thy loving kindness, O God! therefore the children of men put their trust under the shadow of thy wings."
"The Golden Text" (1 John 3: 18): "My little children, let us not love in word, neither in tongue; but in deed and in truth."
Lectures to be read from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, include the following: "The rich in spirit help the poor in one grand brotherhood, all having the same Principle, or Father; and blessed is that man who seeth his brothers' need and accomplisheth it, seeking his own in another's good."

Methodist Episcopal Church

Evangelistic service, 7:45 p. m.
All are welcome regardless of circumstances.
100% Pentecost.

Community Church
West Point Park
Rev. O. J. Lyon, Pastor
10:00 Sunday School.
11:00 Preaching Service.

CAMPUS AWAITS FARMERS' WEEK JAN. 30 TO FEB. 3
All major facilities on the campus of Michigan State College are in readiness for the 24th annual Farmers' Week Jan. 30 to Feb. 3 as agricultural departments of the college complete details in their plans.
No major phase of agriculture in Michigan will be neglected in the program. From horse pulling contests to the lighter touch of a part of clove dancers in an entertainment skit, the five days of education and amusement are filled with scheduled events.
In 1938 the event drew an estimated total attendance of more than 50,000 rural persons from all sections of the state.
The 1939 program depends largely now upon the weather man, says E. L. Anthony, dean of agriculture and general chairman for the week, and R. W. Tenny, short course director.
For the men, the meat of the program will center around latest scientific knowledge in engineering, poultry, horticulture, soils, farm crops, animal husbandry, dairying, conservation, forestry, economics, farm management and entomology.
For the women there will be opportunity to watch a good style review, hear talks and see demonstrations in food, clothing, psychology, home furnishings and home management.
Wednesday and Thursday evenings some of the lighter sides of the week will occur when Demonstration Hall will see a succession of events beginning with a concert by the college military band and terminating each evening with the horse pulling competitions.
"It is a mystery to me that we continue to spend such vast sums of money on fleets and an army which by the types of their organization and location are more suited for a great mass overseas invasion of some other country than for a reasonable defense of our own borders."—Major General William C. Rivers (ret.).

ROUGH, TOUGH, PICTURESQUE SENEY IS DEAD
A 10-cent padlock hangs from the door of Seney's empty jail, reports a field worker gathering material for the Michigan Guide, a Federal Writer's Project publication. The scene's rendezvous in this little Michigan "ghost" town today is the restaurant and newsstand where customers eat butterscotch pie while waiting for the mail train from Manistowic, 40 miles away.
But Seney a few generations ago was a rip-roaring, wild-running "General of the Middle West" as preachers pointed out. Some of the country's hardest eggs lived, earned and died there. There was "Roaring Jim" Gleason, "Protestant Bob" McGuire, "Fighting Jim" Morrison, "Killer" Shea, "Frying Pan" Mac, "Three Gun" Summers, and died there. There was "Roaring Jim" Gleason, "Protestant Bob" McGuire, "Fighting Jim" Morrison, "Killer" Shea, "Frying Pan" Mac, "Three Gun" Summers, and Leon Czolgoz, who assassinated McKinley.
Seney was destined to violence even of woodmen who set up the claim that later became Seney, broke every window in the train that brought them there. Just playing.
The sly killings. There were too many.
One character was "Raymond" who had left a high public office in a Southern state because of scandal. He had indefinite culture and when in his cups captured the lid and Odyssey in Greek, beating time with a bung starter.
Then there was "Old Light Heart" who slept in two sugar barrels placed end to end and lived on raw beef livers. His toes had been amputated because of frost bite. Whenever he became drunk Seney's play-boys would nail the tips of his shoes to the sidewalk walk just to see him pelt on his head when he attempted to rise. But that was tame stuff. Once a gang of toughies from a nearby lumber camp pulled out the Seney jail to liberate a pal whom a daring town marshal locked up on the charge of disturbing the peace. He had only bitten off someone's ear.

How to Increase Soil Fertility

CHICAGO.—How farmers can avoid hit-or-miss methods of improving soil fertility and take advantage of information to determine the plant food requirements of their land was explained by Walter F. Pollock, agronomist director of the Middle West Soil Improvement Committee in a recent address before an agricultural-industrial conference.
"Years ago farmers could profitably buy farmyard manure and use the commercial fertilizer only for the purpose of supplementing manure produced on their own farms," said Mr. Pollock. "Today the element of the practicability of using farmyard manure, so that the wise farmer first puts some questions to his soil.
"The farmer may conduct some plot experiments with fertilizer, but if it is near seeding time he should get a list of recommended fertilizers from his County Agent and determine the formula particularly adapted to his crop and soil needs. And as long as he adheres to recommended grades, he will be able to purchase fertilizer intelligently and utilize it effectively in meeting the plant food needs of his soil.
"Soil improvement is a sound investment only when fertility is added to the soil," Mr. Pollock concluded. "Practical-minded farmers merely maintaining an existing low level of fertility but recognize that they must add necessary plant food elements to the soil if they are to maintain the use of their farm holdings and insure high crop productivity per acre."
