British Scientist Tracks Crowned Eagle to Aerie
Months ago Capt. C. W. R. Knight, noted British trainer and photographer of large birds, sailed for South Africa, chiefly to film the crowned eagle in its native habitat. He discovered most nests of these eagles are in the highest trees in the forests, making it impossible to find them, and he found every move of the eagles could be observed, says the National Geographic society.

Captain Knight photographed the activities in the nest for weeks while the mother eagle sat on the eggs and the male brought small monkeys and other animals caught in the vicinity. Because the crowned eagles are so fond of monkey flesh they are called the "ogres of Africa's monkeys." Monkey bones litter the earth beneath their nests. After the eggs hatched one of the eaglets died; the other was captured by Captain Knight, who will train it to falconry.

Captain Knight's motion picture and still cameras also recorded rare shots of the secretary bird, which is rapidly becoming extinct. A member of the vulture tribe, with still-like legs, this bird kills snakes, lizards and moles to death and then swallows them whole.

Neighbors Gather To Watch Plant Bloom

The home of Miss Anna Thayer, Shady Side Ave., was the center of much interest Thursday night when a group of friends and neighbors gathered to watch the Night-blooming Cereus unfold its blossoms.

Mr. and Mrs. James Eastman brought this plant from Canada eleven years ago and it had not bloomed since that time. The plant belongs to group of cacti that seldom blossom. When the blooms do come they unfold all in one night, usually about midnight, and the blossom falls apart the next day.

The apple blossom was designated as Michigan's official state flower by joint resolution of the legislature in 1897.

BOOKS SENT OUT BY TUBERCULOSIS ASSOCIATION

A new teacher aid "Hints on Teaching Health," is being distributed throughout Michigan this week by the Michigan Tuberculosis Association in cooperation with local tuberculosis societies. The booklet compiles a list of available health material and furnishes new ideas for programs.

By supplying schools throughout the state with this material, the Michigan Tuberculosis Association is helping to turn the task, required by law, of teaching children about communicable diseases and health into a pleasant one. For the catalogue contains suggestions for projects illustrating health lessons, tells of countless posters which may be obtained for the asking, and describes available pamphlets.

In addition a complete unit for teaching tuberculosis prevention and a program called "A Seven Point System of Health Education" are included.

New in this year's edition are suggestions concerning "morning inspection" and a section on Michigan Tuberculosis laws. The latter has been condensed and simplified so that children may readily understand it.

"Hints on Teaching Health," along with many other materials are a part of the health education program carried on in Michigan from the proceeds of the annual sale of Christmas seals.
