#### Low Cest Soil Building Plan for Michigan Farms

Week

nt Makes Po Soil Improveme

CHICAGO.—How Michigan farm-ers can greatly increase the value of farm manure and thus reap prof-its from a year-round, low-cost soil

its from å year-round, hw-cost soll building program was explained in a tatement by the Middle West Soil improvenient Committee! "The select lies in adding 20 per cent superphosphate i de the ma-nure," Op Committee points out. "Such an Investment," ligsty, "will year and the production.

Possible Crops Like The ...

'There is no better suries of plant food that manure.' It spys, 'but by itsid it has serious limitations. Because of the limited amount produced of the average farm, only a small percentage of the lytially important feeding elements—nitrogen, phosphoric acid jand potast—results of the control of the plant of the control of the control

of adding commercial fertilizers to insure a successful crop producing process is successful crop producing process is apposent. It is a successful crop and the size of the s

and 1.32 more pounds of clover.

How to Apply

"Methods of triading the amore with superpheaphile may very according to farm conditions, but the program should be carried on the program should be ca
