Mrs. Thornton, son Harold Clark, and granddaughter, Patsy Rich of

There are now over 170 transcontinental telephone circuits on four different routes between the Atlantic and Pacific coasts. There were only three circuits available in 1915 when the first transcontinental route was opened.

Long distance telephone operators, in talking with each other, use more than 200 routines codes and abbreviations which help expedite the service. An example is the initials "DA" which mean "Don't answer."

Nearly 100 calls per second are made on an average from New York City's 1,950,000 telephones.

In 1922, the average time required to complete a long distance telephone call was nearly ten minutes. The same operation now requires only about 34 seconds.

When you call someone by telephone in Mexico City, he'll probably answer with "Bueno."

LOSEY CORNERS

Edward Brown and family have been visiting his mother, Mrs. D. V. Mitchell on Maplewood and his wife, Mrs. Arthur Howes of Detroit. Mr. Brown has made his home for the past several years in Pennsylvania.

The house owned by Mr. and Mrs. Robert Fredericks, 1883 Maplewood, recently occupied by Mr. Alex Yeoman, has been sold to Mr. and Mrs. Clemens, young people from Wisconsin. The house in which Mr. and Mrs. Fredericks live has been purchased by Mr. and Mrs. Richard Treaster of Detroit. Mr. Fredericks bought the land about 20 years ago, moving here from Maine. He erected five houses, one now owned by Roy Davis and another purchased by Albert Schermer of the Republic. Plans to move to Florida sometime in the near future.

The last unit of the Wilcox school is being cleaned and put in readiness for use this fall. It will make six rooms and help greatly in relieving the congestion of last year.

Mr. and Mrs. Robert Fredericks entertained a party of friends Sunday afternoon at their home. Among those who came to the party were Mr. and Mrs. Tamm and Mr. and Mrs. Miuor.

315,000 TELEPHONE WORKERS SERVE NATION. Number Equals Estimated Total of American Troops in Revolution; 82% in the Bell System.

At the beginning of 1940, there was a total of 283,000 employees in the Bell Telephone System, not including the Western Electric Co. and the Bell Telephone Laboratories. There were, in addition, some 55,000 employees in more than 6,000 non-Bell connecting and other telephone companies in the country, making a total of more than 315,000 persons directly employed in giving telephone service in the United States. This figure does not take into consideration the large number of persons employed in telephone research or in manufacturing or supplying materials to telephone companies.

Of the 229,500 employees of the Bell System operating companies, 193,000 are men and 15,200 are women. Of the men 82,350 are employed in the plant department, and of the women, 118,950 serve in the traffic department.

The total of 283,000 men and women directly concerned in supplying the country's telephone service is virtually a small army, and is comparable to the number of troops of this country engaged in the Revolutionary War. Estimates of the total who served in the Revolution run from 250,000 to about 400,000.

The present number of telephone employees is greater also than the total number of American troops who served in the Spanish American War, and more than 200,000 were called to the colors. It is also nearly three times the number of American troops who engaged in the war with Mexico, when about 115,000 were under orders.

The tongue of the just is as choice silver; the heart of the wicked is little worth. -Proverbs 10:20.

In your subscription about to expire, come to the Enterprise office or send in your renewal order.
