"GOD'S KINGDOM"
I'll rule this earth said man one day,
As he gazed on the wealth that grazed him lay.
He caused a river to change its bed,
And many a barren plain was fed.
He built a tower he thought would stand,
But the tower was built on shifting sand.
He sailed the ocean and scaled the height,
And then into the heavens he looked for one night.
And up from his heart went a humble prayer,
For he knew that "God" was ruler there.

—Mrs. Robert Fredericks

Facts About the Telephone

When you call someone by telephone in Mexico City, he'll probably answer with "Bueno."

Nearly 100 calls per second are made on an average from New York City's 1,650,000 telephones.

In 1922, the average time required to complete a long distance telephone call was nearly ten minutes. At the same operation now requires only about 34 seconds.

Long distance telephone operation is a talking with each other, use more than 200 routine codes and abbreviations which help speed the service. An example is the initials "DA" which mean "Don't answer."

There are now over 170 transcontinental telephone circuits on four different routes between the Atlantic and Pacific coasts. There were only three circuits available in 1916 when the first transcontinental route was opened.
