TUBERCULOSIS SPECIALISTS TO MEET AT LANSING

Tuberculosis specialists from all parts of the United States and Canada, are being brought to Lansing on October 30 and 31 for the Michigan Tuberculosis Association's 34th annual meeting. T. J. Werle, executive secretary announced this

week. The conference will include members of the Michigan Tuberculosis Society and the Michigan Sanatorium Association.

Rapidly developing plans indicate that this meeting will be an outstanding one, Mr. Werle stated. Mrs. Saldie Orr Dunbar, president of the General Federation of Women's Clubs and former executive secretary of the Oregon Tuberculosis Association, is scheduled to

speak at an open luncheon meeting. Dr. Leroy Gardner, laboratory director for the Trudeau Sanatorium at Saranac, New York, will appear before the Trudeau Society.

Dr. G. C. Brink, director of tuberculosis prevention for Ontario, Canada, and Dr. Henry Cook, past president of the Michigan State Medical Society, are to be featured in the main banquet meeting. Among other outstanding speakers

will be Dr. Bruce H. Douglas, tuberculosis controller of Detroit, Miss Metta Bean, director of social work for the Wisconsin Anti-Tuberculosis Association, both of whom will take part in a forum on "Social and Economic Aspects of Tuberculosis."

An important part of the conference will deal with the coming 1940 seal sale, proceeds of which support year-round tuberculosis

programs. Featured in this session will be C. L. Newcomb, seal sale director, and Daniel McCarthy, public relations director, both from the National Tuberculosis Association.

Early in the meeting seven new trustees will be selected by Michigan Association members. The trustees then elect association officers, in whose care will be entrusted planning and execution of the 1941 tuberculosis program.

knew the flavor of Michigan apples was far superior to all others and he used only Michigan apples in his pies.

I have ever deemed it more honorable and more profitable, too, to set a good example than to follow a bad one.—Thomas Jefferson.

"Man, governed by immortal Mind, is always beautiful and grand. Each succeeding year unfolds wisdom, beauty, and holiness."—Mary Baker Eddy.

Blume Cow Record Exceeds Average

A new record, exceeding the average of the Guernsey breed for her age and class has just been completed by a two year old cow Lucy Duvoisin 516889 of Farmington, tested and owned by W. A. Blume. Her official record supervised by the Michigan State College and announced by The American Guernsey Cattle Club is 9794.2 pounds of milk and 401.5 pounds of butterfat in class GGG.

MICHIGAN APPLES GIVEN BOOST BY TRAIN CHIEF

Miss Jean Doty, Michigan's Apple Queen, after explaining the qualities of Michigan apples to all visitors at the Michigan State Fair during her ten day reign in Detroit, received a pleasant surprise on visiting Tony Snyder, chief of the New York Central Lines streamlined passenger train, the Mercury.

Chief Tony informed Queen Jean that apple pie was the most popular of all pies with diners on the Mercury. He stated that although he featured different fresh fruit pies each day on his menu, apple pie remains the first choice of the majority of passengers on the streamliner every day of the year.

When the pretty dark haired queen asked Tony what apples were the best for pies, he informed her that there were several different varieties which he preferred. These included the Dutchess variety during the early growing season, and then followed the Wealthy, Baldwin, Greening and Northern Spy. He explained that all of these varieties follow each in flavor maturity and that he used each in its best season.

When Queen Jean asked Chief Tony if he used only Michigan apples in his pies, he stated that it was unnecessary for her to explain the qualities of Michigan apples to him, because he fully

See through Glass Car

General Motors spent \$250,000 to build a glass car for exhibition at the 1940 Golden Gate International Exposition. Alleen Poole (left) stretched out on the floor (glass) boards and Doris Hiltz crawled under the front fender to prove you can see through the machine.

'Mother Knows Best' Doesn't She?

Guiding their inquiring minds and dynamic activities... choosing their food, clothes, entertainment and health needs... the well-informed modern mother knows what is best for the welfare of her offspring. And it is safe to say that an incalculable share of her accurate information has had its beginning in the advertising columns of this newspaper.

Many of the advertisements today bristle with ideas. They are more than catalogs. In the true sense, they are education! Scientific minds contribute to their contents. Their recommendations are based on deep thought. Their words are carefully chosen; their diction studiously formed for clarity and understanding.

Through advertisements the mother of today learns authoritatively about new methods in the care of children's teeth. About antiseptics and hygienics. About body-building and health-giving foods. About new comforts as well as new styles, in juvenile wearing apparel. About books and schools and vacation camps.... The advertisements pour innumerable hints and suggestions into her store of knowledge. They make her a more capable manager of the home and guardian of the family exchequer.

"Mother knows best"—is this expression heard about your home? Is it just an admonition? Or, is it founded on facts. Reading advertisements will to help make it so.
