HELPFUL Hints

on taking care of your ELECTRIC RANGE
"Take good care of the things you have," reads the U. S. Government's Consumer's Pledge—and this applies with special force to many things that are irreplaceable. Your electric range must last for the duration, and to help you use it carefully and wisely, these few suggestions are offered:

(1) Never use a stiff brush or sharp instrument to remove spilled food from heating elements. Food spilled on open surface units should be burned off. (Avoid letting spilled food dry or harden on the range.)

(2) Roasting or broiling meat in the oven deposits grease on the oven walls. When cool, wipe the inside of the oven with a damp cloth. This should be done each time after use.

(3) Wash outside of range with warm soapy water. On most ranges with closed-type surface units, these may be raised up so that the pan underneath can be removed for cleaning. Check manufacturer's directions.

(4) Ventilate your oven after each baking operation by leaving the door ajar.

By following these simple rules, you will be giving your electric range the care it deserves, and your precaution may help to avert a possible breakdown or damage. Conservation of critical metals and repair materials helps the war effort. The Detroit Edison Company.
