STATE OF MICHIGAN
THE CIRCUIT COURT FOR THE T
COUNTY OF OAKLAND
IN CHANCERY
No. 2318:

GEORGE W. KELLER, his
vs.
MELVA WIXSON KELLER,
Plaintiffs,

THOMAS F. GARNER, Jr., JOSHUA F.
Jr., LOCKWOOD CLARK, and the
known heirs, devisees, legatees and
assigns, Defendants.

Suit pending in the Circuit Court

or "L. M. 1 D. 12"

t. "WHAT kind of fertilizer will I

"What kind of fertilizer will I have for growing crops this year?" is a question Michigan farmers are asking as they prepare to break all war-time records in producing foods, fats and fibers for Uncle Sam's fighting forces, civilian population and our allies.

Michigan farmers know that a considerable portion of the chemical nitrogen supply has been "drafted" by munitions factories for making bombs, shells and other explosives. No nitrogen was used for fertilizing small grains in 1918. None will be available for small grains this year, a drastic cut for non-all

It takes both a tough and a lady hands to pull the strings behind the scenes. It takes both . . . War Bonds and taxes to finance the staggering cost of this global war. Buy War Bonds and more War Bonds every day. *—Henry Ford*

Synthetic Rubber

Synthetic rubber can also be reclaimed and has been commercially

How about other crops? Will there be any chemical nitrogen available for them?

The answer is yes. And as for phosphorus and potash, no one need worry. There will be plenty

Synthetic Rubber

Synthetic rubber can also be reclaimed and has been commercialized.

But every pound of nitrogen will have to be stretched out to the utmost. In order to obtain the maximum benefit from the nitrogen available for agricultural purposes in 1943, the War Production Board, in collaboration with the U. S. Department of Agriculture has prepared regulations concerning the production, distribution and use of fertilizers. Fertilizer manufacturer

A total list of grades numbering 21 has been approved for sale in Michigan in 1913, of which eleven will contain chemical nitrogen. None other than these may be sold. For the sake of economy, it has been suggested to manufacturers that they offer not more than two grades

ac- all the approved grades. It is likely

The complete list of approved grades is as follows: 0-10-7; 0-12-12; 0-16-8; 0-14-14; 0-14-20; 0-20-10; 0-12-24; 0-24-6; G-15-6; 0-12-12; 0-16-12; 0-12-12; 0-12-12; 0-16-6; 0-16-12; 0-14-12; 0-14-18 and 18 or 20 per cent superphosphate. For side or top-dressing vegetables only, a 10-6-4 grade is likewise provided.

Basis for Use

In cases where Michigan farmers have been accustomed to use a complete fertilizer containing nitrogen, phosphorus and potash, special regu-

County advisers, agricultural experiment station workers and fertilizer producers, dealers and distributors have detailed information from which they can give farmers specific advice regarding problems based on WPB rulings.

In the event a Michigan farmer growing small grains in 1943, used an analysis containing less than 1 per cent nitrogen on other crops in the 1940-41 season, he may submit the following analysis:

0-12-36; 0-20-10; 0-14-14; 0-12-24;
0-14-7; 0-20-20; 0-9-27; 0-16-8; and 1
or 20 per cent superphosphate.

For grades used in 1940-41 or earlier, Michigan crops other than small grains, the following substitutions may be made: Grades with 2 per cent nitrogen are to be replaced by 2-8-16; 2-12-6; or 2-16-8. Grades with 3 per cent nitrogen are to be replaced by 3-9-13; or 3-12-12. Grades with 4 per cent nitrogen or more are to be replaced by 4-10-6; 4-12-4; 4-16-4; or 10-6-4. Multiple stream-

or 4-24-12.

Short Short Story
 "At a stag dinner at a certain club some years ago there sat, between Owen Johnson and myself, a young writer who was known for his polished light fiction. But this occasion glum as a clam on this subject, and finally admitted that he hoped the critics would take his next volume more seriously and not speak of his light touch. Then he fell again into an abysmal silence. Afterward Owen said to me: 'The trouble with poor X is that he has severed his jocular vein.' — Charles Hanson Towne.
